

A woman with long blonde hair, wearing a black leather motorcycle jacket, light blue jeans, and a black helmet with orange accents, stands next to a black and silver motorcycle. The motorcycle has red and white graphics on the side, including the word "VEST". They are positioned in front of a dark, vertically-ribbed metal wall. To the right, a portion of a grey stone wall is visible. The scene is lit with warm, low-angle sunlight, creating long shadows.

Our Core Values

Since its inception, Covec Limited has consistently aimed to deliver innovative solutions and products to the motorcycle industry. We are committed to working closely with technical partners to bring the best products and cutting-edge technology to market, ensuring consumers have access to the highest quality offerings in the industry.

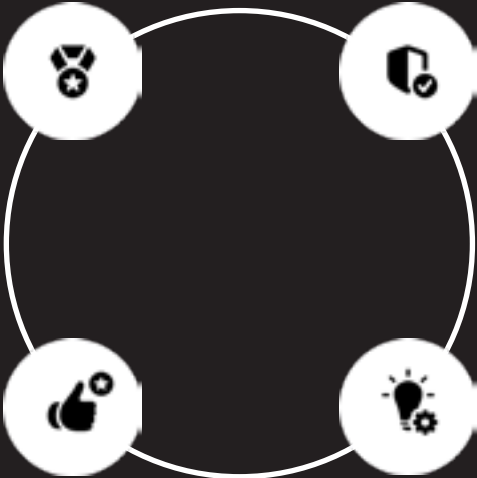

Our vision is to continuously advance our technological innovations and maintain our leadership in material development. We also strive to expand our presence in the UK distribution sector, leveraging our established networks and diverse expertise to provide exceptional service and top quality products across the industry.

Integrity

We uphold the highest standards with any interaction. Ensuring honesty, transparency and accountability.

Reliability

We consistently deliver dependable and timely service, ensuring commitments and promises are met.

Service

We pride ourselves on service excellence, putting our customers first to ensuring satisfaction. Going above and beyond.

Innovation

With technical textiles at our core, we continue to ensure we are leaders in the space with continuous development

Kings Award 2025

Covec Limited Honoured with King’s Award for Innovation — Oneskin Denim sets new benchmark for Motorcycle Riding Gear.

British technical textile innovator Covec Limited has received the King’s Award for Innovation 2025 for its revolutionary Covec Oneskin denim—a single-layer motorcycle fabric that combines CE-rated abrasion protection with exceptional comfort and flexibility.

The award follows Covec’s Queen’s Award for International Trade in 2020, making it the company’s second royal honour and recognising both its technical innovation and global success.

By delivering high-level protection without the bulk of traditional multi-layer motorcycle jeans, Oneskin has been adopted by leading motorcycle brands worldwide and has set a new benchmark for riding apparel.

The King’s Awards for Enterprise are among the UK’s highest business honours, with the Innovation category recognising outstanding technological achievement.

“Winning a second royal award is a tremendous honour, our Oneskin technology has redefined rider protection, and to see it recognised at the highest level is validation of the work our team has put in—not just to innovate, but to push global standards forward.”

Keith Bloxsome
Managing Director

Our History

Founded in 2011 by former speedway rider Keith Bloxsome, Covec Limited was created to provide a high performing alternative to the motorcycle apparel industry in the way of technical textiles.

With firsthand experience of the markets shortcomings at the time, Keith knew there had to be a better answer, and so began our expertise in technical denim.

Over the last decade, we have continued to develop our materials and showcase them through our inhouse brand 'Bull-it' which has seen global success alongside our OEM partners.

With our expansion so prominent on all fronts, we relocated to a larger premises and started our distribution journey.

Now boasting the connections, knowledge and facility to service the United Kingdom, we work closely with our partners to ensure only the highest quality products are affiliated with ourselves and our network.

AJAX

THE VERSATILE ALL-ROUNDER

Available in Slim, Straight and Easy fits and three leg lengths, the Ajax is the perfect choice for high-mileage riders of all sizes looking for unfussy style, comfort, durability and, of course, class-leading protection.

Constructed with the comfortable but tough Covec® Oneskin denim shell, the washed blue finish features subtle whiskering, white stitching and tasteful Bull-it branding. Protection is enhanced by new breathable and biodegradable RE ZRO® level 1 hip and knee armour. This result is a classic mid-rise jean that is quite simply the perfect addition to any rider’s wardrobe.

FURY AA

FURY AA

STRETCH IN STYLE

Available in the contemporary Skinny fit, the all-new super-stretchy Fury Black combines high street style with comfort, practicality and several well considered motorcycle-specific touches.

Breathable, biodegradable RE ZRO® level 1 knee armour comes as standard while additional Covec® Lite reinforcement in key areas adds even more rider safety and confidence.

The high-rise design with double button ensures good coverage, and avoids that unsightly gap between jacket and jeans while the rear has been redesigned to be more flattering – and less flattening. Evolved and refined for our best ever skinny black riding jean!

RAVEN

THE CLASSIC BLACK JEAN

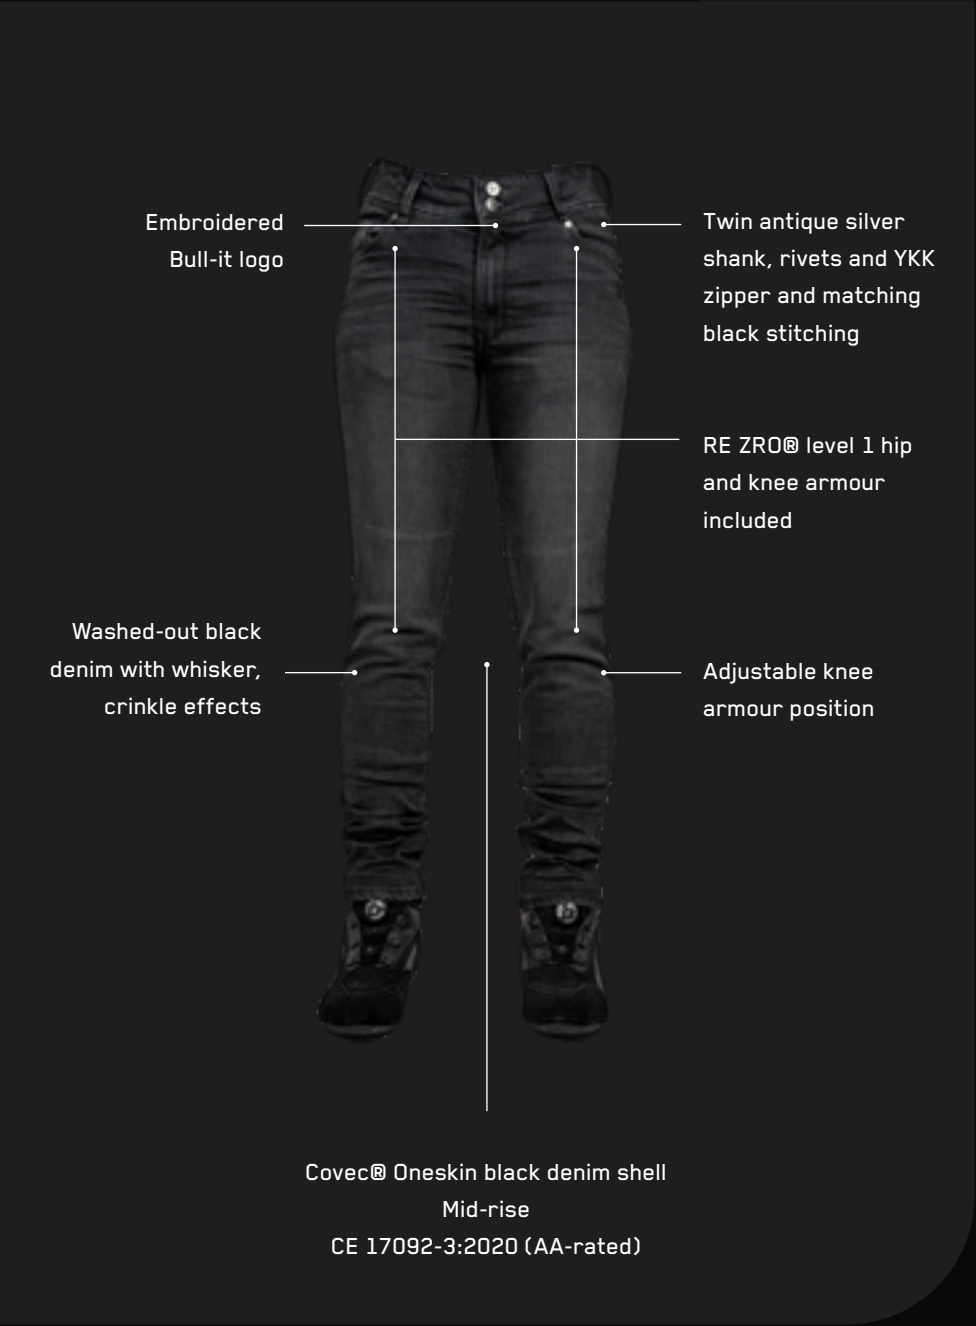

Available in both Slim and Straight fits, the Raven offers female riders of varying shapes the same stylish riding jean, packed with detail effects that bring texture and style, all finished in a fashionable washed-out black denim.

The Slim fit features a new shape that gives an improved fit in key areas while the Straight fit is a more relaxed, traditional cut.

Both fits deliver all the usual Bull-it hallmarks when it comes to comfort and safety, and feature breathable, biodegradable, RE ZRO® level 1 hip and knee armour as standard to deliver AA-rated protection.

MACNA 

SUITS

MIZURO 1PC

A racing suit made of kangaroo leather, developed with professional athletes. A Mizuro consists of the exact same fabrics, protectors, and construction as the MVP GP01 suits of our professional MotoGP riders.

Your Mizuro is constructed from superior kangaroo leather, which is the strongest leather out there. It is more flexible and lightweight compared to cow leather. The stretchy parts are made of reinforced Kevlar stretch fabric.

KEY FEATURES

- 100% MotoGP specs
- Made in Italy
- Tailored to your wishes

JACKETS

SYNCHRONE JACKET

The optimal configuration with three separately wearable jackets, developed for riders who want to brave all conditions.

The Synchrone consists of a directly laminated waterproof shell, a breathable mesh core and a thermal liner. All jackets fit into each other and can be worn simultaneously. The thermal liner can be worn separately off-bike, whereas the shell and core are suited for the road. A Storage Bag is included to store layers you're not using.

This construction provides the benefits of a 3-layer jacket without its disadvantages, such as the jacket becoming too wide and protectors floating around when layers are taken out. The DL shell doesn't soak up water, which keeps it lightweight and makes it dry faster. When the temperature shifts, you can easily adjust your set-up by adding layers over the base jacket.

TRYTON

A 3-layer anorak-style jacket with an off-centred main zip that runs the full length, developed for adventure, sports, and naked bike riders in all conditions and seasons.

The Tryton jacket is developed from our innovative Bradical jacket, and the first 3-layer anorak-style jacket on the market. It features an off-centred main zip that runs the full length of the jacket and a large kangaroo pocket at the front.

It is suited for all seasons thanks to the detachable thermal liner in combination with the detachable Raintex ML membrane. The membrane is very comfortable on the skin as it is laminated against mesh fabric.

We’ve opted for discreet reflective Night Eye™ elements to make you better visible when it really matters. During the day, Night Eye™ is part of the fashionable design of your garment. At night, the microscopic dishes that cover the reflective back-layer will reflect light back to its source, making you stand out like a lighthouse on wheels.

Large 3D-mesh ventilation panels at the chest, back, and arms are fitted to ensure plenty of ventilation on warmer days. To make sure air is able to pass the body and cool it along the way, you can open up the air outlet at the back without having to take your jacket off.

Our new Quick Vent™ system features two buckles at the collarbones, which open up the air outlet when pulled. The buckles can be secured to the push buttons on the chest pockets to keep the outlet open.

The Tryton is prepared for the MUPBP-1 base plate to be attached to the back, which enables expansion of luggage capacity through modular gear such as our MUHB-1 hip bag.

This jacket comes with our very own Easy Cuff™; a system that makes use of a zip – instead of loops and snaps – to keep everything in place. This nifty spec connects the detachable layers to each other and prevents your hand, wrist or watch from getting stuck when putting on or taking off your jacket.

Other in-house developed differentiators are Belt Loop™ (to prevent your jacket from creeping up in case of a fall) and Dynamic Cuff™, which enables a better fit between sleeve and glove.

The hood can be zipped off or kept in place by the Hoodie Holder™, and the Water Exhaust™ prevents the jacket from getting soggy by dispersing water between the membrane and outer shell.

Our RISC™ level 1 impact protectors are present at the shoulders and elbows and easily accessible thanks to the Quick Pockets™. A RISC™ back protector is separately available and can easily be placed in the designated compartment. Be sure to check the size table before purchasing one.

The Tryton is what we call riding gear!

BRAVIC **NEW**

An aggressive all rounder, the Bravic jacket is a waterproof sporty jacket packed with features. This jacket features new Intair shoulder vents, and ventilated panels at the front, back and sides of the jacket - perfect for warm days but with a detachable insulated Raintex membrane for when bad weather catches us out. Bravic also includes Confold, so the jacket can be folded conveniently into a backpack.

The Bravic Jacket includes CE level 1 RISC shoulder and elbow protection, and has a pocket for an optional back protector. Inkeeping with its sporty appeal, the Bravic has RISC EVA exterior shoulder caps, and the hood can be removed.

KEY FEATURES

- Convertible into backpack
- Raintex waterproof membrane
- CE Level 1 RISC protectors at elbows and shoulders

TERRITOR 2.0 MENS NEW

The Territor 2.0 for women is all-season ready, with a feminine fit and only a single detachable layer (which is waterproof and insulated) that keeps it lightweight, flexible, and comfortable.

A detachable insulated Raintex membrane keeps rain and cold at bay when the weather turns. When temperatures rise, ventilation panels at the chest, back, and sleeves help fresh air flow through the jacket. The Electric Power Guide keeps heated gear cables neatly routed, so warmth never comes at the cost of comfort.

KEY FEATURES

- Convertible into backpack
- Raintex waterproof membrane
- CE Level 1 RISC protectors at elbows and shoulders

BASTIC 2.0 NEW

The Bastic 2.0 takes our popular bomber jacket a step further with updated fabrics and a refined fit, bringing extra comfort and a cleaner feel to every ride.

CLIMATE
Ventilation panels at the chest, back, and sleeves help fresh air circulate when temperatures climb. The Summer Comfort System keeps airflow working where you need it most, while the Electric Power Guide neatly routes heated gear cables for colder days.

KEY FEATURES

- *Ventilated panels for air circulation*
- *Detachable hood*
- *CE Level 1 RISC protectors at shoulders and elbows*

REBELITE

A ventilated, anorak-style jacket with a utility-style look, developed for sports and naked bike riders in warm conditions.

The Rebelite jacket is incomparable with its anorak style and off-centred main zip that runs the full length. Aside from the large kangaroo pocket at the front, it also has a large pocket at the back.

It is suited for warm riding conditions thanks to the large 3D-mesh ventilation panels at the chest, back and arms that ensure plenty of ventilation on warmer days. We call this differentiator Air Burst™.

STYLES

i

Sizes	Black	Black/Grey	Black Camo/Taupe
XS	163029	163043	163057
Small	163031	163045	163059
Medium	163033	163047	163061
Large	163035	163049	163063
XL	163037	163051	163065
2XL	163039	163053	163067
3XL	163041	163055	163069

The hood can be secured in the Hoodie Holder™ at the back to prevent it from flapping around when riding. Alternatively, it can be taken off completely.

Another in-house developed differentiator is the Belt Loop™, which prevents your jacket from creeping up after securing it to the belt of your jeans.

To enable expansion of luggage capacity, we've prepared this jacket for our MUPBP-1 P.A.L.S. baseplate. This accessory features the Pouch Attachment Ladder System that enables you to attach one of our utility bags to your jacket.

Our RISC™ level 1 impact protectors are present at the shoulders and elbows. A RISC™ back protector is separately available and can easily be placed in the designated compartment. Be sure to check the size table before purchasing one.

The Rebelite is what we call riding gear!

ATRACOR UPDATED

A wind-blocking softshell jacket for sports and naked bike riders in mild to hot riding conditions.

The Atracor is made of softshell fabric which gives it excellent wind-blocking capabilities. It is fitted with a fixed mesh liner and doesn't feature a waterproof membrane. The absence of a membrane prevents it from getting sweaty in warm riding conditions.

KEY FEATURES

- Summer Comfort System™
- Hoodie Holder™
- Belt Loop™

STYLES

			NEW	NEW
Sizes	Black	Black/Fluo Yellow	Black/Gold	Blue/Orange
Small	147195	169015	176928	176976
Medium	147197	169017	176930	176978
Large	147199	169019	176932	176980
XL	147201	169021	176934	176982

3XL	147205	169025	176938	176986

Ventilation is easily created along the entire length of the jacket with our Summer Comfort System Lite™. Open the main zip and attach it to the second zip possibility to reveal mesh fabric alongside the main zip. Another differentiator can be found at the bottom of the main zip. This reinforcement called Zip Grip™ lets you zip up with ease, even with gloves on.

Other in-house developed differentiators are Belt Loop™ (to prevent your jacket from creeping up in case of a fall) and Hoodie Holder™; a synthetic holder in which the hood can be anchored to prevent it from flapping around. If you like the look or if you're expecting a local shower after parking, this is the perfect alternative to zipping off the hood completely.

Our RISC™ level 1 impact protectors are present at the shoulders and elbows. A RISC™ back protector is separately available and can be placed in the designated compartment with ease. Be sure to check the size table before purchasing a back protector.

The Atracor is what we call summer-proof riding gear!

OXIMESH MENS NEW

A wind-blocking softshell jacket for sports and naked bike riders in mild to hot riding conditions.

The Atracor is made of softshell fabric which gives it excellent wind-blocking capabilities. It is fitted with a fixed mesh liner and doesn't feature a waterproof membrane. The absence of a membrane prevents it from getting sweaty in warm riding conditions.

GLOVES

LAZULAR RTX DL NEW

The Lazular is designed to work with our heated ecosystem, fitting comfortably over a heated inner glove — such as the Helio — while providing weather protection and touring comfort.

EXO RISC protection at the knuckles and fingers helps absorb impacts while maintaining flexibility and comfort. A RISC TPU palm protector adds impact protection in a key contact area during a fall. The double-leather palm increases durability and abrasion resistance, while the reinforced little finger provides extra protection for one of the hand’s most vulnerable areas.

KEY FEATURES i

- RISC™ EVA knuckles
- Ergothumb™
- Raintex Direct Laminate

GLADIUS RTX DL

A long-cuffed, direct-laminate glove with rubber-like protection at the knuckles, and a reinforced leather palm, suited for riders in mild/rainy riding conditions.

The Gladius is fully made of goat leather with a double layer reinforcing the palm, and a tricot liner is fitted inside.

Its waterproof Raintex membrane is laminated directly against the outer shell. This prevents the glove from soaking up water and becoming wet, cold, and heavy. A direct laminate glove also dries much faster compared to other waterproofing methods.

This glove is equipped with knuckle protection made of thermoplastic rubber (TPR), and soft EVA protection at the palm, fingers, and cuff. Both materials provide absorption and distribution of impact forces.

Heat-conductive fabric is fitted at the tips of the index fingers. Thanks to the Touch Tip, you'll be able to operate touch screens without taking your gloves off.

To enable as much freedom of movement as possible, our 30° Buckle™ is fitted at the wrist.

We've included a flexible extension at the ridge of the index finger that works like a Screen Cleaner™, which enables quick and easy removal of water to clear up your view.

The Gladius is what we call ultimate waterproof riding gear!

FIROZ NEW

A new sporty glove with a full cuff and racing inspired graphics, with an aggressive price to match.

This glove combines comfort with features; made from perforated goat and cow leather with synthetic nubuck, this glove is super soft, flexible and ventilated making it a great solution for sporty summer riding. The Firoz glove has RISC protection throughout the glove, with RISC Carbon TPU knuckles and palm slider and RISC EVA fingers and thumb. The glove also has a double leather palm, reinforced and connected little finger.

A perfect sporty glove from the first ride.

PELOR NEW

The short cuffed alternative to the Firoz. Packed with safety features while being light and comfortable, this glove is the perfect solution to sporty summer riding.

The Pelor glove has RISC protection throughout the glove, with RISC Carbon TPU knuckles and palm slider and RISC EVA fingers and thumb. The glove also has a double leather palm, reinforced and connected little finger.

Made from perforated goat and cow leather with synthetic nubuck, Pelor is super soft and supple from the very first ride.

PELGRAM COOLING

ONE OF A KIND

The Pelgram's most unique feature is its cooling liner, which is made of a newly developed material called Evercool™ that provides a cooling effect when it comes into contact with your skin. Mesh is used at the back and perforated nubuck throughout for optimal ventilation. The palm is made of synthetic nubuck and reinforced with an extra layer to ensure a high level of abrasion resistance.

It features our Ergothumb™ construction, which reduces pressure points to raise comfort and provides a wrinkle-free look. Touchscreens can be operated thanks to the heat-conductive fabric used at the tip of the index finger. Its superb fit can be perfected by velcro at the cuff.

ARMOUR

Knuckles are guarded by a pre-shaped R.I.S.C.™ 3D protector, which is made of temper foam and provides impact absorption — just like the flexible EVA accents at the thumb and fingers. The palm is fitted with a solid, impact-absorbing, and abrasion-resistant R.I.S.C.™ protector made of TPU.

KEY FEATURES

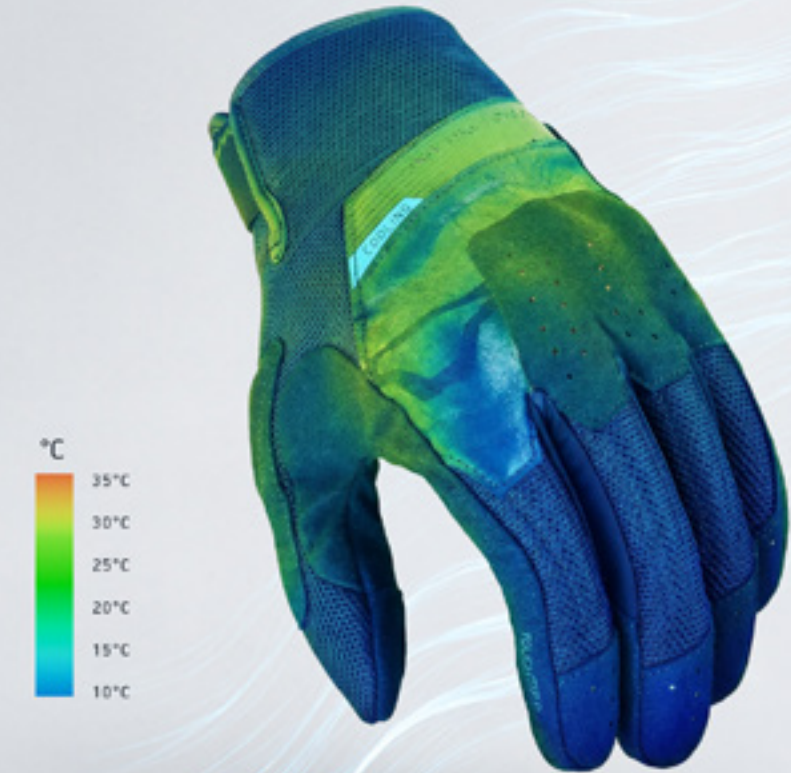

- Evercool™ cooling fabric
- R.I.S.C.™ 3D foam knuckles
- R.I.S.C.™ TPU palm (reinforced)

02 THERMAL MAP // EVERCOOL™

EVER
COOL™

MISHUN RTX

The Mishun is equipped with a waterproof Raintex membrane and made of softshell fabric that provides resistance against rain and wind, breathability, and no breaking-in. Its palm is made of goat leather and reinforced with another layer to ensure a high level of abrasion resistance. This glove is lined with silky soft Bemberg for comfort and insulated to retain warmth.

It features our Ergothumb™ and Ergopink™ constructions, which reduce pressure points to raise comfort and provide a wrinkle-free look. Touchscreens can be operated thanks to the heat-conductive fabric used at the tip of the index finger. Its superb fit can be perfected by the 30° Brace™ at the wrist, which also provides improved dexterity.

Knuckles are guarded by pre-shaped R.I.S.C.™ Gemini protection, which consists of two parts, ensuring a better fit and improved overall dexterity at the handlebars. The palm is fitted with a solid, impact-absorbing, and abrasion-resistant R.I.S.C.™ protector made of TPU.

TREKON NEW

Functional when it's hot so the utilitarian can keep going. Complete your utility look with the Trekon: a short-cuffed and reinforced wingman that lets air burst past your hands and cool 'em along the way.

Both the palm and knuckles are guarded by solid, impact-absorbing, and abrasion-resistant R.I.S.C.™ protection made of TPU. Impact-sensitive areas are reinforced with a second layer of fabric to provide a high level of abrasion resistance.

KEY FEATURES

- Air Burst™
- R.I.S.C.™ TPU knuckles
- R.I.S.C.™ TPU palm (reinforced)

HAROS 2.0

A short-cuffed glove with goat leather and TPR at the palm, knuckles, and fingers, meant for riders in hot conditions.

The Haros 2.0 features two layers of goat leather at the palm, and spandex fabric at the back of the hand. Spandex fabric is stretchy and breathable, making it ideal for hot riding conditions.

Rubber-like TPR protectors are fitted at the palm, knuckles, and fingers to provide impact absorption and distribution in case of an incident.

KEY FEATURES

- **Ergothumb™**
- **RISC™ TPR knuckles and fingers**
- **RISC™ TPR palm (reinforced)**

RALSTON

DIFFERENTIATORS

The Ralston is based on a traditional worker glove, mixed with nearly forty years of glove knowledge to ensure a superb fit. Critical areas are reinforced with a second layer of leather, and areas without reinforcement are perforated to ensure enough ventilation.

It features our Ergothumb™ construction, which reduces pressure points to raise comfort and provides a wrinkle-free look. Touchscreens can be operated thanks to the heat-conductive fabric used at the tip of the index finger. Its superb fit can be perfected by velcro at the cuff, and the glove is finished with a retro looking MACNA graphic at the back.

ARMOUR

Knuckles are guarded by a pre-shaped R.I.S.C.™ 3D protector, which is made of temper foam and provides impact absorption — just like the flexible EVA protection at the palm.

DARKO WOMEN

A comfy glove with a short cuff, EVA padding at the knuckles, and a rubber-like TPR protector at the palm, suited for riders in hot riding conditions.

The Darko is made of synthetic nubuck (leather) and spandex, a combination that provides an incredible level of comfort when temperatures start to soar.

Soft EVA padding is located at the knuckles to raise your comfort some more. At the palm, we've opted for a protector made of TPR for additional impact absorption.

The inside of the fingers are fitted with a Grip Print, and the thumb and index finger are made of one and the same panel of fabric. This feature is called Ergothumb™ and raises your comfort by reducing seams and pressure points.

The Darko is what we call the essence of riding gear!

HEATED

E-HEATED ECOSYSTEM

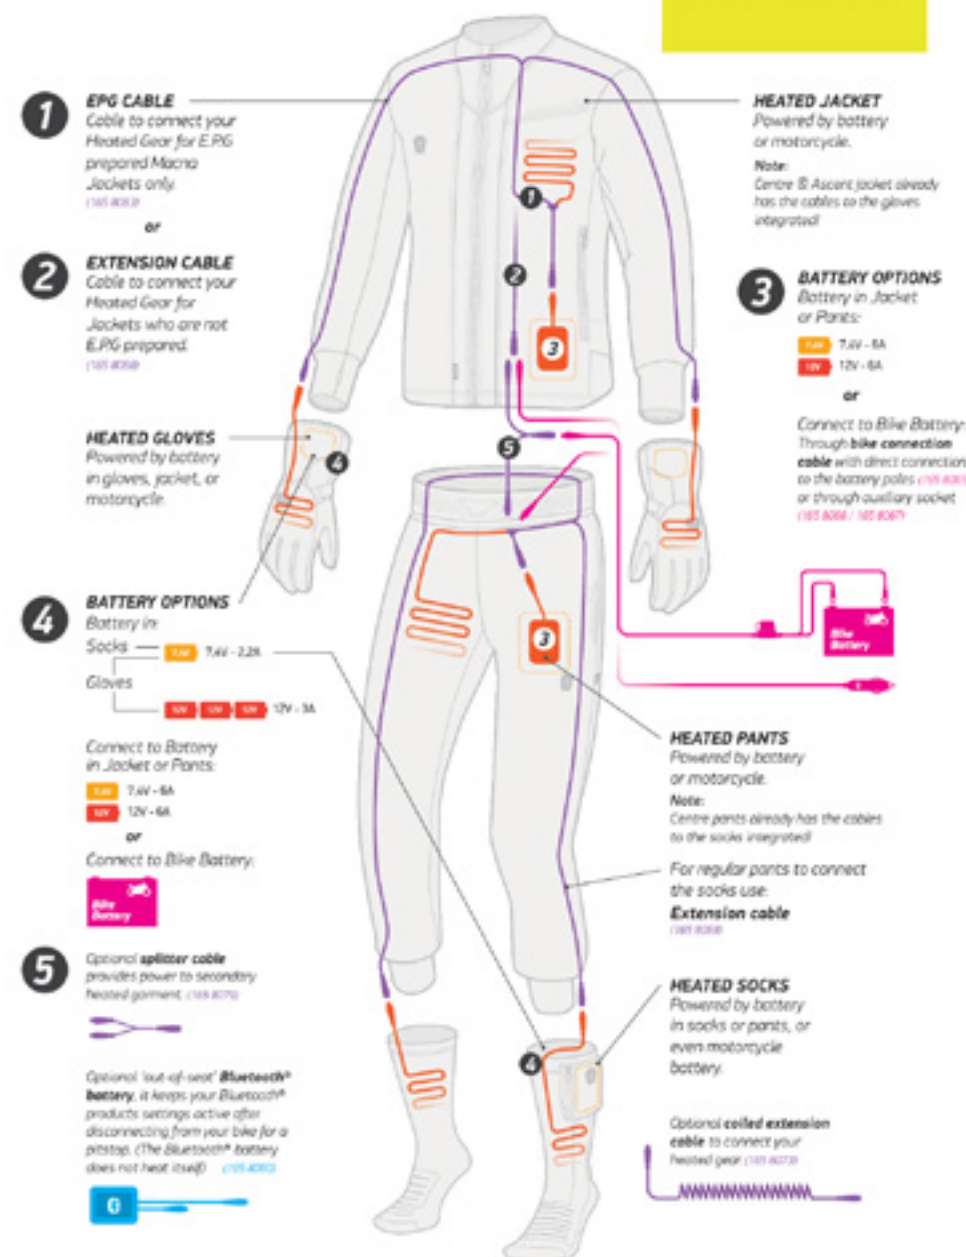

With 20 years of experience and numerous in-house developed technologies, we are your wingman in the cold. Our e-heated ecosystem includes several garments that enable you to heat any and every body part you want.

The unique Dual Power technology lets you switch between a 7,4V and 12V power supply whenever you like. There are three ways to power your garments; a battery in the glove or jacket, or a direct connection to your motorcycle.

Batteries feature our Power Expansion System, which divides the cells of a battery in an ergonomic way to prevent bulk at the wrists. Bluetooth® technology is present in our ecosystem, enabling you to connect all garments to the MACNA Heated app and control them with one hand.

Our e-heated ecosystem provides full freedom when it comes to combining different garments and a suitable power supply to brave the cold.

THAT'S
WHAT WE CALL
WARMTH AND
COMFORT!

5 STEPS TO WARMTH AND COMFORT

STEP 1

CHOOSE YOUR HEATED COMBINATION

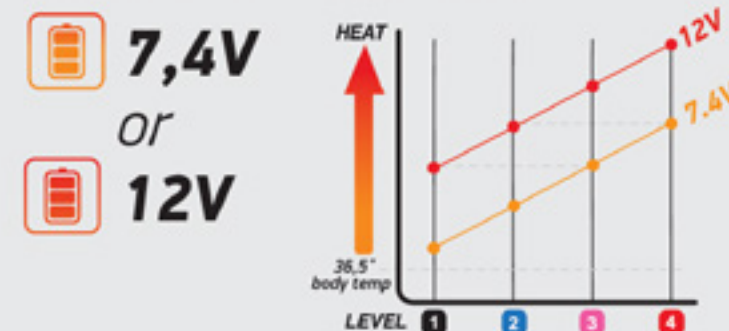

STEP 2

CHOOSE YOUR GARMENTS

JACKETS / PANTS / GLOVES / SOCKS

STEP 3

CHOOSE YOUR POWER SUPPLY

12V batteries heat faster and reach higher temperatures compared to 7,4V. The higher the amperage of the battery, the longer it'll last before it needs a recharge.

STEP 4

ACCESSORIES

STEP 5

INSTALLATION

HEATED APP

The MACNA Heated App lets you take full control over your e-heated gear. Connect your gear to your phone via Bluetooth® and you'll never have to search for tucked away power buttons every again.

ASCENT

An electrically heated base layer jacket, developed for daily commuters and riders in cold conditions.

The Ascent is both able to raise your core temperature and retain the warmth it provides. It is fitted with a layer of down feathers to retain warmth and create that comfy feeling, as if you're lying in your own bed. This jacket is also suited to be worn as stand-alone garment during outdoor activities such as fishing and hiking.

- Dual Power Technology™

NUCLEO

An electrically heated and insulated jacket which can be fitted inside motorcycle jackets but also worn separately, developed for daily commuters and riders in cold to mild conditions.

The Nucleo has two pockets and can be worn as a stand-alone heated jacket, but it's also possible to fit it inside a motorcycle jacket by use of the loops and snaps that connect inner layers.

CENTRE JACKET

An electrically heated base layer jacket, developed for daily commuters and riders in cold conditions.

The Centre is both able to raise your core temperature and retain the warmth it provides. It is fitted with our Heat Reflection System™, which is a very thin film on the inside of the garment that reflects heat that would otherwise be lost. This makes the garment more efficient as the need for energy is reduced.

PROGRESS 3.0 RTX DL NEW

The Progress 3.0 takes our premium winter glove even further as the world’s first heated glove that can be charged from the outside thanks to the magnetic charging port.

CLIMATE

The waterproof construction combines Raintex at the back of the hand with Raintex Direct Laminate technology at the palm, preventing water absorption, reducing drying time, and improving grip. Water Exhaust 2.0 allows rainwater trapped between layers to escape, helping to prevent a cold, soggy feeling. Heating elements at the back of the hand, over the fingers, and beneath the fingertips provide warmth where it is needed most. Four heating levels let you fine-tune the temperature, while Dual Power technology allows you to choose between battery power or a direct connection to your motorcycle. The battery level indicator keeps you informed of the remaining power, and the magnetic charging port makes recharging quick and easy.

ECOSYSTEM

This product is part of our heated ecosystem, which enables you to connect all pieces of heated gear with each other and power them with only a single power source. There are 3 different ways to power your ecosystem: by batteries in the cuffs of your gloves, a battery inside your jacket, or a direct connection to the battery of your motorcycle.

KEY FEATURES

- RISC TPR palm protector
- Bluetooth® connectivity
- MACNA® Heated app

XL	174521	174535
2XL	174523	174537
3XL	174525	174539

COMFORT

Bluetooth® technology allows you to control the heating system through the app without stopping to remove your gloves. Centrack keeps the fastening strap aligned with the zip, creating a secure closure around the wrist. The 30° Buckle follows the natural angle of your wrist for a more comfortable fit, while Ergothumb and Ergopink reduce pressure points by following the shape and movement of your hand. Touch Tip technology allows touchscreen use without removing the gloves, and the integrated Screen Cleaner helps wipe away rain or dirt from your visor.

SAFETY

Armax protection at the knuckles and fingers helps absorb impacts while maintaining flexibility. A RISC TPR palm protector adds impact protection in a key contact area, and the double-leather palm increases durability and abrasion resistance. Night Eye technology reflects light back towards its source, helping you become more visible to other road users after dark.

RAFINO RTX

A long-cuffed, waterproof, electrically heated glove with a leather palm and EXO R.I.S.C.™ protection at the knuckles, developed for adventurers and riders in cold conditions.

The Rafino has an adventurous design and it's fully waterproof thanks to its Raintex membrane. It's fitted with a comfortable thermal lining and insulation to retain the warmth it provides.

AZRA RTX

A waterproof and electrically heated glove with a leather palm and flexible knuckle protection, developed for daily commuters and riders in cold conditions.

The Azra is fitted with protection at the knuckles, fingers and palm of the hand. The knuckle protector is made of TPR, which is a flexible yet robust rubber with a great strength to weight ratio. The palm and finger protection are made of soft and flexible EVA padding, and the palm is reinforced with leather all the way up to the outside of the little finger.

KEY FEATURES

- RISC™ TPR knuckles

FOTON 2.0 RTX

A waterproof and electrically heated glove with a reinforced palm and padded protection at the knuckles, developed for commuters and riders in cold conditions.

The Foton 2.0 has evolved from our longest running heated glove and it's improved in every area. A fully waterproof Raintex membrane is fitted to keep your hands dry and impact-absorbent padding is fitted at the knuckles and palm to provide safety where it is most needed. The glove is made of durable Cordura, and the palm of the hand is reinforced with nubuck fabric.

BLUETOOTH HEATED GRIPS

Grab the bull by the heated horns and tame the cold with innovation. Experience the world's first electrically heated motorcycle grips with Bluetooth® technology — and our unique, heated ecosystem.

Just like our heated clothing, the grips are equipped with durable Powervein™ wiring known for its effective heat release, and 4 different heating levels ranging from 40 to 100%. The grips are made of TPR, a rubber-like material that is able to absorb vibrations. They feature grip texture for improved grip, a weatherproof unibody design, and integrated buttons to maintain its smooth look.

These heated grips are suitable for 22 mm handlebars (left: 22 mm, right: 25.4 mm) and 125 mm in length. It is possible to cut them to size if you're looking for 120 or 116 mm. They have an open end to enable mounting of handguards or bar weights. Alternatively, the open ends can be covered by the included caps.

KEY FEATURES

- Bluetooth® connectivity
- Suitable for 22mm handlebars
- Open ends for handguards or bar weights

COOLING VEST EVO

Chances are likely you like to ride when the sun's out and the weather is at its best. Minor downside of our big friend in the sky, though, is that he burns even fiercer when you're stationary at a traffic light, for example.

If riding a powerful machine on a hot day isn't enough to tire you out, being cooked in your own gear might do the trick. Aside from increased fatigue and a loss of concentration, overheating is a serious matter that is best to be prevented.

Luckily, there are plenty of options to keep your body temperature in check en prevent dangerous situations. Many of these options, however, do not cool you enough or only for a short amount of time.

When it comes to cooling vests, there's an even bigger downside: you are likely to get wet. Preventing a wet back by making your back wet; that's no improvement. With our EVO cooling vest, you can wave your hand goodbye to downsides all together!

KEY FEATURES

- **Works with 600ml (tap) water**
- **Can cool down to 15 °C below ambient temperature**
- **Cools for up to 3 days**

SPRAY RAIN JACKET

A waterproof jacket that can be worn over a motorcycle jacket, developed for riders in rainy conditions.

The Spray rain jacket is made of waterproof polyester and equipped with an air outlet at the back to prevent the jacket from blowing up like a parachute. Its fit can be adjusted at the cuffs.

This jacket is fitted with laminated reflective elements on all sides and our in-house developed Coat Hanger Lite™ at the back so you can easily hang your jacket to dry.

Its Storage Bag is equipped with a Water Exhaust™ to enable any remaining waterdrops to evaporate.

The Spray is what we call rainwear!

SPRAY RAIN TROUSERS

A waterproof pants that can be worn over a pair of motorcycle pants, developed for riders in rainy conditions.

The Spray rain pants is made of waterproof polyester and designed to be easy to put on. Both at the waist and ankles, this pants is very wide to ensure easy entry.

Its fit can be adjusted by velcro at the cuffs and by snap at the waist.

At the cuffs you'll also find laminated reflective elements, whereas the waist is fitted with stretch fabric to ensure the pants stays in place.

Its Storage Bag is equipped with a Water Exhaust™ to enable any remaining waterdrops to evaporate.

The Spray is what we call rainwear!

BACK PROTECTOR RISC

The safest choice. An ergonomically designed and breathable back protector that is worn inside the jacket, providing CE level 2 protection for your entire back. This full back (FB) protector provides the highest level of protection and covers the largest possible area.

The R.I.S.C.™ full back protector is made of polyurethane (PU), which provides high tear resistance, flexibility, and toughness — even in extremely hot and cold conditions.

The R.I.S.C.™ full back protector is tested, approved, and fully complies with European law. It provides CE level 2 safety and is available in two sizes. Make sure to check out the size table before you purchase a back protector.

CHEST PROTECTOR

A unique, ergonomically designed protector that provides CE level 1 protection in the chest area. It consists of two parts that are placed in a pocket, and interlock when you close the zip of your jacket or suit.

The R.I.S.C.™ C01 chest protector is made of polyurethane (PU), which provides high tear resistance, flexibility, and toughness — even in extremely hot and cold conditions. It is tested, approved, and fully complies with European law.

Thanks to its unique structure, the protector is capable of absorbing and distributing impact forces to keep you safe. The hexagonal structure is hollow in the centre to raise both flexibility and ventilating capabilities.

Pockets

- Two waterproof outer front pockets with additional side access
- Waterproof document pocket
- Inner pockets
- Credit card pocket on the left underarm

Sustainability

- YKK VISLON® front zipper with Revived Top Stop (the YKK VISLON® with Revived Top Stop features a specially designed top stop that allows the slider to be easily removed and replaced. This allows customers and repair shops to easily remove sliders from garments and replace them with new sliders when needed, contributing to a more sustainable garment lifecycle).
- Recycled polyester mesh lining

Protection

- R.I.S.C. protectors on elbows and shoulders, level 2
- R.I.S.C. back protector, level 2
- R.I.S.C. prepared Chest protector
- GORE-TEX ARMACOR™ 3-layer laminate reinforcements on the shoulders, elbows, and back
- SuperFabric® on the shoulders
- Reflective prints on the front, back, and sleeves
- DANE safety belt
- Long and short connection zippers

Certification

- Class AA according to EN 17092-3:2020

Material

- Shell: 97% polyamide (e.g., GORE-TEX ARMACOR™), 2% aramid, 1% elastane;
- Mesh lining: 100% polyester (recycled);
- Thermal lining: 100% polyester (PrimaLoft®);
- Membrane: 100% ePE (GORE-TEX Pro)

BORNHOLM GORE-TEX® PRO

The Dane Bornholm Pro Motorcycle Jacket is designed for adventure riders who need superior protection and comfort in all weather conditions. Featuring a GORE-TEX® Pro 3-layer laminate, this jacket is both waterproof and highly breathable, ensuring you stay dry without overheating during long rides. Its outer shell is constructed from durable CORDURA® fabric, offering excellent abrasion resistance and durability.

For impact protection, the Bornholm Pro comes equipped with RISC shoulder and elbow armour, providing top-tier shock absorption in the event of a fall. The jacket also has a thermal lining that is removable, making it versatile enough for use in both cold and warm weather. Ventilation zippers strategically placed on the chest and back allow for optimal airflow, keeping you cool on hot days.

The jacket is designed with a comfortable fit and features multiple adjustment points for a tailored feel. It also includes reflective detailing for enhanced visibility in low-light conditions, ensuring safety during night rides. With its rugged construction and practical features, the Dane Bornholm Pro is perfect for motorcyclists looking for dependable gear that performs in all seasons.

- Adjustable cuff
- Adjustable waist strap
- Connects with pants
- RISC Armours
- CE Lvl 2 RISC Back Protector

SVENDBORG GORE-TEX®

The Dane Svendborg Motorcycle Jacket offers a perfect balance of protection, comfort, and versatility for touring and everyday riders. Built with a 2 Gore-Tex layer-laminate, it ensures waterproof and windproof protection while remaining breathable, making it suitable for all weather conditions. The jacket's durable polyamide fabric construction delivers high resistance to abrasion, keeping you safe during long rides.

For added protection, the Svendborg comes equipped with SAS-TEC armor at the shoulders and elbows, offering exceptional impact absorption. The jacket also features a removable thermal lining, allowing you to adapt to changing temperatures, making it ideal for both colder climates and warmer weather.

Ventilation zippers are strategically placed to improve airflow, keeping you cool on hotter rides. Adjustable waist and cuff closures ensure a customized fit, while reflective details enhance visibility in low-light conditions, promoting safety during night rides.

With its combination of practical features and premium materials, the Dane Svendborg is designed for riders who demand reliable performance and comfort in all conditions, whether you're commuting or embarking on long-distance tours.

- Adjustable cuff
- Adjustable waist strap
- Connects with pants
- Large chest vents

SKJOLD PROTECTOR

The Dane Skjold jacket is the perfect heatwave solution. A protective, stretchy mesh jacket with 4 pockets, this can be worn alone or under another jacket. The combination of stretchy polyamide fabric with 3D mesh makes this jacket perfectly fitted while providing ultimate hot weather comfort and protection.

The Skjold jacket comes with Level 2 R.I.S.C armours on the shoulders and elbows, and has a pocket for optional back protector. It’s available in back, with subtle reflective panels on the front, sides and back for nighttime visibility.

- 3D Mesh Polyamide Fabric
- 4 pocket design
- Reflective panels for night visibility
- RISC Armours
- CE Lvl 2 RISC Back Protector

ESBY H-DRY

The Dane Esby HDry Motorcycle Boot is a premium waterproof touring boot designed for both comfort and protection. Featuring advanced HDry® technology, it provides a fully waterproof yet breathable barrier, ensuring dry feet in any weather. The boot’s reinforced construction includes CE-certified protection on the ankles and heels, offering superior impact resistance without sacrificing mobility. A durable Vibram® sole delivers excellent grip on various terrains, while reflective details enhance visibility in low light. With its adjustable Velcro and zipper closure system, the Esby HDry boot is perfect for long rides, blending safety, functionality, and style seamlessly.

LEMVIG GORE-TEX® NEW

Meet the DANE Lemvig GORE-TEX® winter glove: the perfect combination of warmth, comfort, and protection for riding in cold and wet conditions. Thanks to the high-quality GORE-TEX® membrane, these gloves are fully waterproof and breathable, while the PrimaLoft® insulation and soft thermopile lining keep your hands wonderfully warm, even during harsh winter rides.

The Lemvig is designed with attention to detail and wearing comfort. Stretch panels, elastic zones, and outward-placed seams ensure a smooth fit and maximum freedom of movement. The longer, adjustable Easy Cuff offers extra protection against wind and rain, so you can fully focus on the road.

In terms of functionality and safety, this glove also scores highly. With touchscreen-compatible fingertips, you stay connected, while the visor wiper on the index finger ensures clear vision in bad weather. Hidden knuckle protection, leather reinforcements, and reflective details complete the package.

- GORE-TEX® winter glove, breathable and durably waterproof
- Extra stretch comfort thanks to the use of stretch fabric
- Conductive material inserts on the thumbs and index fingers
- Visor wiper on the index finger
- Covered TPR knuckle protection

HELSINGOR GORE-TEX® NEW

Meet the DANE Helsingor GORE-TEX glove. Built for riders who chase long roads and wild weather. The mix of leather and textile gives you strength without stiffness. The GORE-TEX Z-liner keeps your hands dry and lets heat escape. So you stay focused when the ride gets rough.

DANE's new 3D knuckle protector for 2026 adds strong impact resistance with impressive comfort. The index finger holds a built-in visor wiper for quick clarity in rain. The conductive fingertip lets you control your touchscreen without removing your glove. Simple. Safe. Ready for any route.

The Helsingor is ideal for spring and fall. It is a bit thicker than a summer glove with Gore plus Grip, yet thinner than a winter glove with insulation. No thermal lining means more flex and more feel. Just pure control and guaranteed dry hands. Available in black and black & grey.

- GORE-TEX Z-liner for full waterproofing and breathability
- Leather textile build for durability and comfort
- 3D knuckle protector for advanced impact safety
- Stretch panels between fingers for improved fit
- Secure fingertip lining to prevent pullout
- Visor wiper on index finger
- Conductive fingertip for touchscreen use
- Ideal for spring and fall riding
- Available in black and black grey

ODIN GORE-TEX® GRIP

The Dane Odin Gore-Tex Grip Motorcycle Gloves are a high-performance choice for all-weather riders, offering unbeatable protection and comfort. Featuring innovative Gore-Tex® Grip technology, these gloves combine waterproofing with breathability, ensuring dry hands in rain while maintaining excellent tactile feedback. With CE-approved knuckle protection and reinforced palms, the gloves provide robust safety without compromising flexibility. The adjustable cuff and Velcro closure system guarantee a snug fit, while touchscreen compatibility allows for device use without removing the gloves. Whether on long tours or daily rides, the Dane Odin gloves are designed to handle tough conditions with durability and style.

THE 100% SYNTHETIC ENGINE OIL FOR SPORTY DRIVING

FOR SPORTS DRIVING ON THE ROAD

FULL POWER KATANA is specially designed to meet the requirements of sporty driving on the road. It guarantees optimum lubrication to exploit the full performance of the high-speed engine.

Formulated with esters and high-performance additives, revs are quicker and the engine protection is ensured.

KEY FEATURES

- Smooth and pleasant gearbox
- Smooth and faster gear changes
- Maximum engine performance at very high speeds
- Engine protection even at full power

RADIATOR LIQUID

READY TO USE COOLANT

SAVE UP TO 5 DEGREES ON YOUR ENGINE TEMPERATURE

RADIATOR LIQUID guarantees optimal cooling of your engine and protection of the entire cooling circuit (hoses, water pump, aluminium and magnesium housing, radiator) by eliminating deposits, thanks to its anti-corrosion and anti-oxidation action.

KEY FEATURES

- Allows you to save up to 5° C on your engine temperature
- Anti-freeze protection
- Removes deposits
- Blue colour

PRODUCT CODE

125ml 800545

X-TREM BRAKE FLUID

BRAKE FLUID FOR COMPETITION

KEY FEATURES

- Extremely high dry boiling point: 328°C
Compatible with Dot 4
- Maintains braking power and effectiveness
- Developed in partnership with the Red Bull
- MotoGP Rookies Cup

PRODUCT CODE

500ml 800930

BRAKE FLUID

100% SYNTHETIC BRAKE AND CLUTCH FLUID

KEY FEATURES

- Dry boiling point: 270°C
- Recommended for hydraulic braking systems
- Compatible with ABS breaking systems
- Compatible dot 3, 4 (Brake Dot 4)
- Compatible dot 4, 5.1 (Brake Dot 5.1)

BRAKE DOT 4

ENGINE CLEANER

TO USE BEFORE YOUR OIL CHANGE

KEY FEATURES

- Removes particles, deposits and clogging
- Facilitates cold starts, acceleration and power recovery
- Reduces exhaust smoke emissions
- Limits oil and fuel consumption

PRODUCT CODE

300ml 800653

INJECTOR CLEANER

TO REGAIN POWER

KEY FEATURES

- Eliminates deposits in the injection system
- Better engine torque at acceleration
- Reduces exhaust smoke emissions
- Limits oil and fuel consumption

PRODUCT CODE

300ml 800654

FUEL STABILISER

FUEL CONSERVATION ADDITIVE

KEY FEATURES

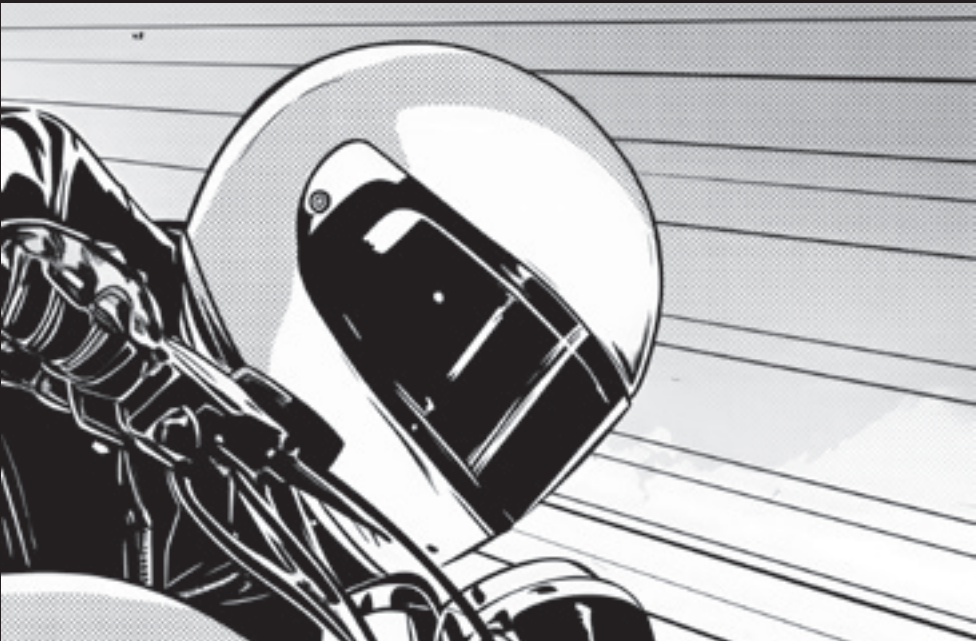

- Conserves fuel for 2 years
- Preserves the properties of gasoline
- Practical dosing bottle
- Reduces maintenance cost

PRODUCT CODE

250ml 800655

CARELINE

X-TREM CHAIN

THE ULTIMATE CHAIN GREASE FOR ROAD AND OFF-ROAD MOTORCYCLES

KEY FEATURES (ROAD)

- Long-lasting performance (800km) in extreme conditions
- Zero projection
- Visible at application
- Multi-position diffuser with retractable rod

KEY FEATURES (OFF-ROAD)

- Resistant to water, sand, mud, soil
- Non-stick formulation
- Zero projection
- Compatible with O-rings

------	--------

CHROM'ALU

RENOVATING CREAM FOR CHROME AND ALUMINUM WITH ACTIVE MICROBEADS

KEY FEATURES

- Removes rust marks and pitting
- Removes light scratches
- Leaves a protective layer that allows to durably preserve their shine
- Cap that opens with a simple gesture of the thumb

PRODUCT CODE

200ml 800675

WHEEL CLEANER

POWERFUL RIM DEGREASER

KEY FEATURES

- Leaves protective layer that delays the appearance of new dirt
- Comfortable trigger & wide and homogeneous diffusion
- Does not damage paints and varnishes
- Compatible with all types of rims

PRODUCT CODE

1litre 800656

S.O.S TYRE

PUNCTURE-PROOF SPRAY

KEY FEATURES

- Compatible with all types of tyres
- Convenient portable format

PRODUCT CODE

200ml 800657

BRAKE CLEANER

POWERFUL DEGREASER

KEY FEATURES

- Removes dust from the brake and clutch system
- Prevents brake squeal
- Extends the service life of brake discs and pads
- Dries quickly without leaving any residue

PRODUCT CODE

750ml 800658

AIR FILTER OIL LIQUID

FOR FOAM AIR FILTERS

KEY FEATURES

- Boost your engine power
- For off-road motorcycles and quads
- Fast drying

CLEANING SPRAY FOR THE EXTERIOR OF THE HELMET

KEY FEATURES

- Efficient on glossy and matt paints
- Does not leave traces
- Does not drip
- Practical transportable format

PRODUCT CODE

100ml 800677

HELMET'IN

CLEANING SPRAY FOR THE INTERIOR OF THE HELMET

KEY FEATURES

- Feeling of freshness
- Evaporates in minutes without leaving traces
- No need to disassemble the helmet
- Convenient transportable format

PRODUCT CODE

150ml 800678

VISOR RAINOFF

EFFECTIVE RAIN REPELLENT FOR VISOR AND BUBBLE

KEY FEATURES

- Tested in extreme rain conditions
- Easy and fast to apply with its sprayer
- Does not run
- Does not leave traces

PRODUCT CODE

100ml 800676

HELMET KIT

1 HELMET EXTERIOR CLEANER + 1 HELMET INTERIOR CLEANER + 1 RAIN REPELLENT + 1 MICROFIBRE WIPE

KEY FEATURES

- Allows you to completely clean your helmet
- Easy to use and highly effective products
- Practical transportable format, can be put under the saddle
- Re-usable Microfibre Wipe

PRODUCT CODE

800735

ROAD CHAIN KIT

1 ROAD CHAIN GREASE 750ML + 1 CHAIN CLEANER 750ML + 1 CHAIN BRUSH

KEY FEATURES

- Degreaser with powerful spray
- Long-lasting grease - 800 km
- Efficient brush
- Retractable rod attached to the sprays

PRODUCT CODE

800736

OFF ROAD CHAIN KIT

1 OFF ROAD CHAIN GREASE 750ML + 1 CHAIN CLEANER 750ML + 1 CHAIN BRUSH

KEY FEATURES

- Degreaser with powerful spray
- A water-resistant off-road chain grease
- Retractable rod attached to the sprays
- Efficient brush

PRODUCT CODE

800737

CLEANING KIT

1L MULTI-SURFACE CLEANER + 1L WHEEL CLEANER + 1 WASH MITT + 1 WHEEL BRUSH

KEY FEATURES

- Degreaser with powerful spray
- Long-lasting grease - 800 km
- Efficient brush
- Retractable rod attached to the sprays
