## Our Core Values

Since its inception, Covec Limited has consistently aimed to deliver innovative solutions and products to the motorcycle industry. We are committed to working closely with technical partners to bring the best products and cutting-edge technology to market, ensuring consumers have access to the highest quality offerings in the industry.

Our vision is to continuously advance our technological innovations and maintain our leadership in material development. We also strive to expand our presence in the UK distribution sector, leveraging our established networks and diverse expertise to provide exceptional service and top quality products across the industry.

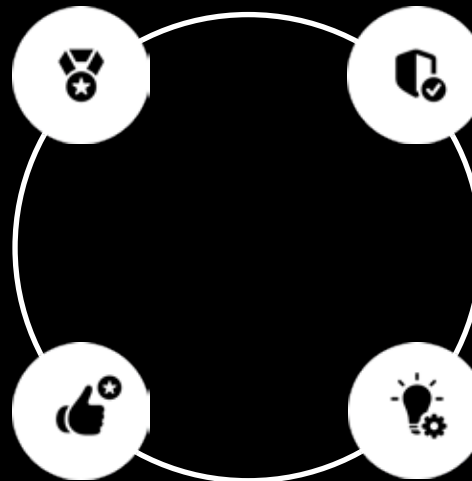

## Integrity

We uphold the highest standards with any interaction. Ensuring honesty, transparency and accountability.

## Reliability

We consistently deliver dependable and timely service, ensuring commitments and promises are met.

## Service

We pride ourselves on service excellence, putting our customers first to ensuring satisfaction. Going above and beyond.

## Innovation

With technical textiles at our core, we continue to ensure we are leaders in the space with continuous development

# Our History

Founded in 2011 by former speedway rider Keith Bloxsome, Covec Limited was created to provide a high performing alternative to the motorcycle apparel industry in the way of technical textiles.

With firsthand experience of the markets shortcomings at the time, Keith knew there had to be a better answer, and so began our expertise in technical denim.

Over the last decade, we have continued to develop our materials and showcase them through our inhouse brand 'Bull-it' which has seen global success alongside our OEM partners.

With our expansion so prominent on all fronts, we relocated to a larger premises and started our distribution journey.

Now boasting the connections, knowledge and facility to service the United Kingdom, we work closely with our partners to ensure only the highest quality products are affiliated with ourselves and our network.

## Kings Award 2025

Covec Ltd Honoured with King's Award for Innovation — Oneskin Denim Sets New Benchmark for Motorcycle Riding Gear

British technical textile innovators Covec Ltd have been awarded the King's Award for Innovation 2025 for their revolutionary Covec Oneskin denim—a breakthrough in single-layer motorcycle apparel that combines high-level protection with everyday comfort.

This marks the company's second royal honour, having previously received the Queen's Award for International Trade in 2020, recognising Covec's global reach and commercial success. Together, the two awards highlight Covec's unique combination of technological leadership and international influence in the world of motorcycle safety gear.

Covec Oneskin delivers CE-rated abrasion resistance in a single layer of denim—eliminating the need for bulky multi-layer constructions while offering class-leading breathability, mobility, and comfort. Since its introduction, Oneskin has been adopted by leading motorcycle brands and worn by riders across the globe, quickly becoming a benchmark in the industry.

The King's Awards for Enterprise celebrate outstanding UK businesses across four categories, with Innovation being one of the most competitive. Covec's double recognition under both monarchs stands as a rare achievement and a testament to the company's sustained growth and technical excellence.

“

Winning a second royal award is a tremendous honour, our Oneskin technology has redefined rider protection, and to see it recognised at the highest level is validation of the work our team has put in—not just to innovate, but to push global standards forward.

”

**Keith Bloxsome**  
Managing Director

A motorcyclist wearing a black helmet and jacket is riding a blue and orange motorcycle on a road at dusk. The motorcycle has a prominent blue front fender and orange side panels. The rider is leaning forward, and the motorcycle is angled towards the left. The background shows a dark blue sky and silhouettes of trees. The road is paved and has a white line. The overall mood is dynamic and adventurous.

# MENS JACKAL

## UTILITARIAN STYLE & PRACTICALITY

The Easy-fit, combat-style Jackal features comfort-enhancing stretch panels on the knees along with deep side and rear pockets with secure press-stud closures. Neat zips on the hems also offer sufficient adjustment to allow larger riding boots to be worn underneath without looking bulky or unsightly.

Using the Covec® Oneskin jet black denim shell to blend urban style with utilitarian practicality, and with the reassurance of RE ZRO® level 1 hip and knee armour, riders of all genres and styles will enjoy the comfort and safety of the AA-rated Jackal.

# MENS AJAX

## THE VERSATILE ALL-ROUNDER

Available in Slim, Straight and Easy fits and three leg lengths, the Ajax is the perfect choice for high-mileage riders of all sizes looking for unfussy style, comfort, durability and, of course, class-leading protection.

Constructed with the comfortable but tough Covec® Oneskin denim shell, the washed blue finish features subtle whiskering, white stitching and tasteful Bull-it branding. Protection is enhanced by new breathable and biodegradable RE ZRO® level 1 hip and knee armour. This result is a classic mid-rise jean that is quite simply the perfect addition to any rider's wardrobe.

TROJAN

# MENS TROJAN

## JET BLACK PERFECTION

The unequivocal classic black riding jean, the Trojan features similar design cues and improvements as the Ajax — this time in Bull-it's deep jet black with copper stitching and antique copper trims that contrast beautifully, adding depth and detail to this stunning new model.

AA-rated and available in a choice of Slim, Straight and Easy fits, and in a wide range of waist sizes and leg lengths, the highly accessible Trojan comes with RE ZRO® level 1 hip and knee armour for comfortable protection to complement the super-comfy Covec® Oneskin jet black denim.

# MENS SPITFIRE

## A TIMELESS CLASSIC

An absolute staple item for the dedicated rider's wardrobe, the dark blue Spitfire is available in a vast range sizes and leg lengths to cater for riders of all sizes and builds.

AA-rated with RE ZRO® Level 1 hip and knee armour, improvements for 2024 include the Spitfire's all-new rear yoke design that allows for an aggressive riding position while reducing the gap between the waistband and the rider's lower back.

Packed with premium design and style touches, the Spitfire is the perfect everyday riding jean for the discerning motorcyclist.

**MASSTIFF**

# MENS MASTIFF

## STYLISHLY SUBTLE

Washed-out mid grey tones are a big hit on the high street right now, so the Mastiff takes that aesthetic and adds all the usual Bull-it benefits.

Soft, stretchy and comfortable — yet strong, durable and protective — the Mastiff's subtle washed-out whisker finish and grey stitching delivers a stylish mid-rise fit. AA-rated thanks to the Covec® Oneskin denim with breathable and biodegradable RE ZRO® level 1 hip and knee armour, this stylish new addition to the Bull-it range for 2024 brings yet another option for riders seeking a fresh new look.

# LADIES FURY BLACK

## STRETCH IN STYLE

Available in the contemporary Skinny fit, the all-new super-stretchy Fury Black combines high street style with comfort, practicality and several well considered motorcycle-specific touches.

Breathable, biodegradable RE ZRO® level 1 knee armour comes as standard while additional Covec® Lite reinforcement in key areas adds even more rider safety and confidence.

The high-rise design with double button ensures good coverage, and avoids that unsightly gap between jacket and jeans while the rear has been redesigned to be more flattering — and less flattening. Evolved and refined for our best ever skinny black riding jean!

**RAVEN**

# LADIES RAVEN

## THE CLASSIC BLACK JEAN

Available in both Slim and Straight fits, the Raven offers female riders of varying shapes the same stylish riding jean, packed with detail effects that bring texture and style, all finished in a fashionable washed-out black denim.

The Slim fit features a new shape that gives an improved fit in key areas while the Straight fit is a more relaxed, traditional cut.

Both fits deliver all the usual Bull-it hallmarks when it comes to comfort and safety, and feature breathable, biodegradable, RE ZRO® level 1 hip and knee armour as standard to deliver AA-rated protection.

# LADIES HARRIER

## MODERN INDIGO CLASSIC

This Slim fit, mid-rise jean in dark indigo blue with a washed-out whisker, crinkle finish and contrasting gold stitching blends traditional style with a contemporary fit and modern technology.

Super-comfortable and supplied with breathable and biodegradable RE ZRO® level 1 hip and knee armour, the Harrier's sharp looks and crisp lines make these AA-rated riding jeans a great choice for old-school retro riders and modern bike lovers alike.

Detailing such as the Embroidered Bull-it 'bull head' logo and twin silver buttons and rivets provide the finishing touches to this very attractive riding jean.

# ENGINEERED FOR PERFORMANCE.

RE ZRO's body armour has been meticulously designed to balance performance, comfort, and sustainability.

## LIGHTWEIGHT FEEL

In sports where every kg counts, impact protection should feel weightless under your gear. RE ZRO's distinctive open geometry design uses minimal material for an ultra-lightweight feel without any compromise on safety, so you can stay focused on peak performance.

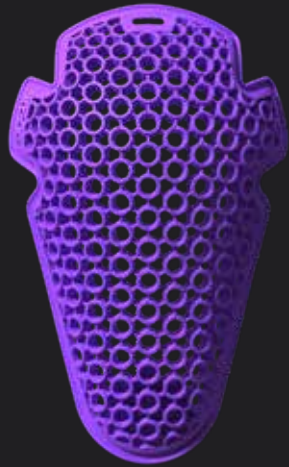

## VENTILATED DESIGN

When the heat is on, you need impact protection that rises to the challenge. The unique structure of RE ZRO® products allows unparalleled airflow for market-leading ventilation and breathability, keeping your body cool so your head can stay in the game.

## FLEXIBLE MATERIAL

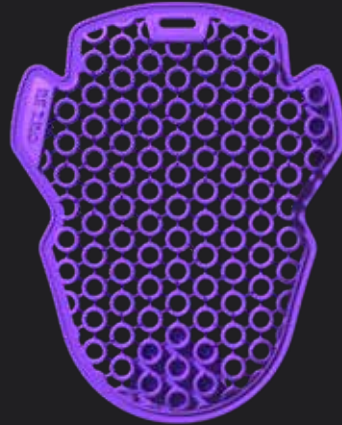

In physically demanding sports, you require impact protection that doesn't restrict your movement. Unlike conventional technology that becomes brittle in low temperatures, RE ZRO® offers unparalleled flexibility, remaining supple in all conditions, from scorching heat to freezing cold.

## IGNITE 1PC

A top-level, on MotoGP-based, leather 1-piece suit for racers and riders in hot riding conditions.

The Ignite consists almost fully of high-quality cow leather. Combining perforated leather, dynamic stretch fabric, and mesh in the right areas provides the best of both worlds; a high level of ventilation and excellent abrasion resistance.

### KEY FEATURES

- High-quality (perforated) leather
- Armax™ shoulders, elbows, and knees
- RISC™ back and chest protector prepared

### PRODUCT CODE

Its Floating Collar™ is made of soft neoprene that doesn't scratch your neck when moving around on the bike. Behind the collar you'll find our Aeroback™ hump that provides improved aerodynamics and protection for your spine, as well as space for a hydration bladder.

The exterior shoulder, elbow, and knee protection features a patented construction that leaves out the need for seams in these (possible) impact areas. By eliminating the weakest link of the construction, Armax™ is able to provide the highest level of safety.

Our RISC™ level 2 impact protectors are present at the shoulders, elbows, and knees. The hips are equipped with level 1 protectors.

RISC™ back and chest protectors are separately available and can easily be placed in the designated compartment. Be sure to check the size table before purchasing a back protector.

At the outside of the knees you'll find the sliders and on the inside of the knees we've opted for rubber-like Knee Grips™ made of TPR.

Last but not least, its inner chest pocket is fitted with a simple yet useful extension that enables quick and easy access to whatever you have stored in there. We call it the Quick Access Puller™.

The Ignite is what we call riding gear!

# ***JACKETS***

////////////////////

## SYNCHRONE JACKET

The optimal configuration with three separately wearable jackets, developed for riders who want to brave all conditions.

The Synchron consists of a directly laminated waterproof shell, a breathable mesh core and a thermal liner. All jackets fit into each other and can be worn simultaneously. The thermal liner can be worn separately off-bike, whereas the shell and core are suited for the road. A Storage Bag is included to store layers you're not using.

This construction provides the benefits of a 3-layer jacket without its disadvantages, such as the jacket becoming too wide and protectors floating around when layers are taken out. The DL shell doesn't soak up water, which keeps it lightweight and makes it dry faster. When the temperature shifts, you can easily adjust your set-up by adding layers over the base jacket.

These layers are connected through our very own Easy Cuff™, a system that makes use of zips instead of loops and snaps, which prevents loose, floating layers inside your jacket. The mesh fabric in the core jacket forms another differentiator called Air Burst™. This construction takes in air to cool the body.

At the front of the collar you'll find a Collar Loop™ that can keep the collar aside when you prefer not to close it. A Coat Hanger™ that is developed to carry the weight of a motorcycle jacket is fitted at the back. At the bottom of the main zip we've opted for a reinforcement that makes zipping up easier. It's called Zip Grip™.

Our RISC™ level 2 impact protectors are present at the shoulders and elbows. RISC™ back and chest protectors are separately available and can be placed in the designated compartment with ease. Be sure to check the size table before purchasing a back protector.

If all of this isn't enough, this jacket is also prepared for additional differentiators. At the upper back, you'll find a pocket for our Vision 2C led light. The chest features two buckles to which our Vision Tech vest can be attached. The vest will stay in place when putting on or taking off the jacket.

The Synchrone is what we call adventurous riding gear!

# FLEXODUS

NEW

## ALL SEASONS

The Flexodus is equipped with a waterproof membrane and thermal liner, both of which are detachable and separately wearable. It is Thermax™ prepared, meaning an electrically heated Thermax™ jacket can be placed inside this one on colder days. Its Water Exhaust™ disperses water caught between membrane and outer layer, and the Electric Power Guide™ (EPG) lets you run cables for heated gear over the thermal liner instead of through your sleeves.

Ventilation is present at the chest, sleeves, and back, most notably in the form of our brand-new feature: Summer Comfort Flex™. SCF consists of a chest piece that can be detached to increase ventilation, or turned around if you prefer a more adventurous look. Side Eye™ reflection is discreet and present where you need it most.

### PRODUCT CODE

3XL	169049

## ONE OF A KIND

This jacket is one of a kind — just like you — because of our patented Confold™ construction that enables you to turn it into a functional backpack so you got your hands free after parking. The backpack is fitted with a Helmet Loop™ to which you can attach your helmet, and it provides enough space for your gloves and essentials.

The Flexodus is equipped with Easy Cuff™ at the wrists, which is a small zip that connects the inner layers of your jacket. The cuffs are also dynamic and adjust themselves to the length of your arms. We call this feature Dyna Cuff™. The inner pocket is easily opened thanks to the Quick Access Puller™, and the collar can be secured by the Collar Loop™ to prevent it from flapping around.

At the back we've fitted our Belt Loop™ that enables you to connect the jacket to the belt of your jeans, and a long 8V connection zip for textile and leather pants. The Coat Hanger is developed to carry the weight of a motorcycle jacket, and the Card Pocket on the left lower arm can be used to store your ID, bank card, or other means of payment or identification.

## ARMOUR

The Flexodus is equipped with CE certified (level 2) R.I.S.C.™ protectors at the elbows and shoulders. R.I.S.C.™ back and chest protectors are separately available and easily placed in the designated compartments — be sure to check the size table before purchasing any.

## RANCHER 2.0 NEW

### AIR SCOOP™

The Rancher 2.0 is equipped with a fixed Raintex ML membrane and a detachable thermal liner. Its waterproof membrane is comfortable on the skin and contains our Air Scoop™: a unique, layered construction of the membrane itself that enables air to pass through the membrane and increase ventilation without sacrificing waterproofness.

### DIFFERENTIATORS

This jacket is equipped with Easy Cuff™ at the wrists, which is a small zip that connects the inner layers of your jacket. At the back, we've fitted a Coat Hanger that's developed to carry the weight of a motorcycle jacket and a short 8V connection zip to connect the jacket to your pants. Ventilation and reflection are present at the sleeves and back, with additional ventilation at the chest. To top it off, we've added a Card Pocket and a Key Ring.

### ARMOUR

The Rancher 2.0 is equipped with CE certified (level 1) R.I.S.C.™ protectors at the elbows and shoulders. A R.I.S.C.™ back protector is separately available and easily placed in the designated compartment — be sure to check the size table before purchasing one.

## TRYTON

A 3-layer anorak-style jacket with an off-centred main zip that runs the full length, developed for adventure, sports, and naked bike riders in all conditions and seasons.

The Tryton jacket is developed from our innovative Bradical jacket, and the first 3-layer anorak-style jacket on the market. It features an off-centred main zip that runs the full length of the jacket and a large kangaroo pocket at the front.

It is suited for all seasons thanks to the detachable thermal liner in combination with the detachable Raintex ML membrane. The membrane is very comfortable on the skin as it is laminated against mesh fabric.

We've opted for discreet reflective Night Eye™ elements to make you better visible when it really matters. During the day, Night Eye™ is part of the fashionable design of your garment. At night, the microscopic dishes that cover the reflective back-layer will reflect light back to its source, making you stand out like a lighthouse on wheels.

### PRODUCT CODE

Black		Brown/Black		Taupe/Black

3XL	160318	3XL	160330	3XL	160342

Large 3D-mesh ventilation panels at the chest, back, and arms are fitted to ensure plenty of ventilation on warmer days. To make sure air is able to pass the body and cool it along the way, you can open up the air outlet at the back without having to take your jacket off.

Our new Quick Vent™ system features two buckles at the collarbones, which open up the air outlet when pulled. The buckles can be secured to the push buttons on the chest pockets to keep the outlet open.

The Tryton is prepared for the MUPBP-1 base plate to be attached to the back, which enables expansion of luggage capacity through modular gear such as our MUHB-1 hip bag.

This jacket comes with our very own Easy Cuff™; a system that makes use of a zip – instead of loops and snaps – to keep everything in place. This nifty spec connects the detachable layers to each other and prevents your hand, wrist or watch from getting stuck when putting on or taking off your jacket.

Other in-house developed differentiators are Belt Loop™ (to prevent your jacket from creeping up in case of a fall) and Dynamic Cuff™, which enables a better fit between sleeve and glove.

The hood can be zipped off or kept in place by the Hoodie Holder™, and the Water Exhaust™ prevents the jacket from getting soggy by dispersing water between the membrane and outer shell.

Our RISC™ level 1 impact protectors are present at the shoulders and elbows and easily accessible thanks to the Quick Pockets™. A RISC™ back protector is separately available and can easily be placed in the designated compartment. Be sure to check the size table before purchasing one.

The Tryton is what we call riding gear!

## REBELITE

A ventilated, anorak-style jacket with a utility-style look, developed for sports and naked bike riders in warm conditions.

The Rebelite jacket is incomparable with its anorak style and off-centred main zip that runs the full length. Aside from the large kangaroo pocket at the front, it also has a large pocket at the back.

It is suited for warm riding conditions thanks to the large 3D-mesh ventilation panels at the chest, back and arms that ensure plenty of ventilation on warmer days. We call this differentiator Air Burst™.

The hood can be secured in the Hoodie Holder™ at the back to prevent it from flapping around when riding. Alternatively, it can be taken off completely.

Another in-house developed differentiator is the Belt Loop™, which prevents your jacket from creeping up after securing it to the belt of your jeans.

To enable expansion of luggage capacity, we've prepared this jacket for our MUPBP-1 P.A.L.S. baseplate. This accessory features the Pouch Attachment Ladder System that enables you to attach one of our utility bags to your jacket.

Our RISC™ level 1 impact protectors are present at the shoulders and elbows. A RISC™ back protector is separately available and can easily be placed in the designated compartment. Be sure to check the size table before purchasing one.

The Rebelite is what we call riding gear!

## TORIDO

A game-changing, ventilated jacket that can be turned into a backpack, developed for riders in warm conditions.

The Torido jacket is incomparable thanks to its patented Confold™ construction. Its back panel features a long vertical zip. By flipping the jacket through this opening and zipping it up again, shoulder straps come out and it can be worn as a backpack.

All protectors can remain in the jacket, and there's enough space for some extra stuff. Attach your helmet to the Helmet Loop™ inside the backpack, toss in your gloves, and enjoy a complete hands-free experience off-bike.

# **DISTEC** **NEW**

## **SEEK OUT THE SUN**

The Distec hoodie is designed for good weather and made of our brand-new Armour Stretch™ fabric, enabling you to move around as much as you need to. Its hood is detachable, but you can also secure it in the Hood Holder™ at the back if you like to be prepared for rain after parking. Both choices prevent the hood from flapping around, just like the Hood String Holders™ at the front secure its strings.

## ONE OF A KIND

This hoodie is one of a kind — just like you — because of our patented Confold™ construction that enables you to turn it into a functional backpack so you got your hands free after parking. The backpack is fitted with a Helmet Loop™ to which you can attach your helmet, and it provides enough space for your gloves and essentials.

At the back we've fitted our Belt Loop™ that enables you to connect the hoodie to the belt of your jeans. Its wrists are equipped with Thumb Loops to prevent the sleeves from creeping up, and the Card Pocket on the lower left arm can be used to store your ID, bank card, or other means of payment or identification. The Zip Grip™ at the bottom of the main zip makes it easy to insert and close when you're wearing gloves.

## ARMOUR

The Distec is equipped with CE certified (level 1) R.I.S.C.™ protectors at the elbows and shoulders. On the outside of the shoulders we've opted for additional R.I.S.C.™ caps that are flexible. A R.I.S.C.™ back protector is separately available and easily placed in the designated compartment — be sure to check the size table before purchasing one.

**BRERO** **NEW****SEEK OUT THE SUN**

The Brero hoodie is designed for the hot season and features Air Burst™: loads of mesh in non-critical areas to ensure a high level of ventilation. Impact areas consist of our brand-new Armour Stretch™ fabric that enables you to move around as much as you need to. Its hood is detachable, but you can also secure it in the Hood Holder™ at the back if you like to be prepared for rain after parking. Both choices prevent the hood from flapping around, just like the Hood String Holders™ at the front secure its strings.

# ADMYRE **NEW**

## MID-SEASON

The Admyre jacket is fitted with a detachable, waterproof thermal liner that is comfortable on the skin as it is directly laminated against mesh fabric. Ventilation is present at the front, sleeves, and back, most notably in the form of our Summer Comfort System™. SCS consists of a second main zip that reveals mesh fabric and provides ventilation over the entire length of the upper body.

## ONE OF A KIND

This jacket is one of a kind — just like you — because of our patented Confold™ construction that enables you to turn it into a functional backpack so you got your hands free after parking. The backpack is fitted with a Helmet Loop™ to which you can attach your helmet, and it provides enough space for your gloves and essentials.

It's also equipped with Easy Cuff™ at the wrists, which is a small zip that connects the inner layers of your jacket. At the back we've fitted our Belt Loop™ that enables you to connect the jacket to the belt of your jeans, and a Coat Hanger that's developed to carry the weight of a motorcycle jacket. The inner pocket is easily opened thanks to the Quick Access Puller™.

## ARMOUR

On the outside, shoulders are guarded by a patented construction called Armax™. This innovation leaves out the need for the weakest link in abrasion-sensitive areas: the seams. On the inside, the Admyre is equipped with CE certified (level 1) R.I.S.C.™ protectors at the elbows and shoulders. R.I.S.C.™ back and chest protectors are separately available and easily placed in the designated compartments — be sure to check the size table before purchasing any.

# BREEZE

An incredibly comfortable and breathable motorcycle hoodie, meant for urban riders in warm riding conditions.

The Breeze is made of breathable cotton, its mesh fabric forms Air Burst™ – a greater intake of air to cool the body - and it's reinforced with aramid fibres for abrasion resistance. Its materials make it suitable for warm conditions and its casual design allows it to blend in perfectly with the urban jungle.

If you're not a big fan of your hood flapping around, you can secure it in the Hoodie Holder™ at the back or zip it off completely. At the front, we've fitted Hoodie String Holders™ so you can park those strings and prevent a drum solo on your helmet when riding.

At the bottom of the main zip we've opted for our Zip Grip™, which is a triangular reinforcement that makes it easier to insert and zip up – even with gloves on.

The Breeze is what we call breathable urban riding gear!

## ENTRITY **NEW**

### AIR SCOOP™

The Entrity is equipped with a fixed Raintex ML membrane and a detachable thermal liner. Its waterproof membrane is comfortable on the skin and contains our Air Scoop™: a unique, layered construction of the membrane itself that enables air to pass through the membrane and increase ventilation without sacrificing waterproofness.

### DIFFERENTIATORS

This jacket is equipped with Easy Cuff™ at the wrists, which is a small zip that connects the inner layers of your jacket. At the back we've fitted our Belt Loop™ that enables you to connect the jacket to the belt of your jeans. Ventilation zips are present at the upper arms and chest, as well as an air outlet at the back.

### ARMOUR

The Entrity is equipped with CE certified (level 1) R.I.S.C.™ protectors at the elbows and shoulders. A R.I.S.C.™ back protector is separately available and easily placed in the designated compartment — be sure to check the size table before purchasing one.

***PANTS***

////////////////////

## SYNCHRONE PANTS

The optimal configuration with two separately wearable pants, developed for riders who want to brave all conditions.

The Synchron consists of a directly laminated waterproof shell and a breathable mesh core pants. They fit into each other and can be worn simultaneously, or you can wear either one of them depending on the riding conditions. A Storage Bag is included to store the layer you're not using.

The DL shell doesn't soak up water, which keeps it lightweight and makes it dry faster, and the core pants is made of mesh to make it breathable. When the temperature shifts, you can easily adjust your set-up by adding layers over the core pants. Even when layers are taken out, the Synchron pants will retain its fit.

These layers are connected through our very own Easy Cuff™, a system that makes use of zips instead of loops and snaps, which prevents loose, floating layers inside your pants. The mesh fabric in the core jacket forms another differentiator called Air Burst™. This construction takes in air to cool the body.

A long connection zip is present to connect your pants to your jacket, and the adjustable waist straps enable you to perfect the pants' fit.

Safety-wise we've incorporated Side Eye™ to make you better visible when it really matters and Heat Shields to prevent a meltdown whenever your pants and exhaust come into contact with each other.

Our RISC™ level 1 impact protectors are present at the hips and the knees are fitted with level 2 protectors. Another differentiator can be found on the inside of the knees; TPR Knee Grips™ that provide a close connection with the bike.

The Synchron is what we call adventurous riding gear!

## QARGON **NEW**

### ONE OF A KIND

The Qargon pant is developed for the hot season and features Air Burst™: loads of mesh in non-critical areas to ensure a high level of ventilation. Its design can only be seriously compared to our ground-breaking Bradical jacket, which was also created for main characters like yourself.

A large cargo pocket is present at the upper left leg and P.A.L.S. webbing is fitted on the right side at the waist. The knees are equipped with soft padding on the outside, and the Pants Hanger™ at the back is made to carry the weight of a motorcycle pant. At the bottom of the leg you'll find a zip, 3 velcros, and a Heat Shield to prevent melting.

### ARMOUR

The Qargon is equipped with CE certified (level 1) R.I.S.C.™ FX protectors at the knees and protection for the hips is separately available. R.I.S.C.™ FX is characterised by its slim design and flexibility, aiding comfort and the discreet look of jeans and cargo pants.

# AGUANO **NEW**

## ONE OF A KIND

The Aguano pant is a protective shell that can be worn over your regular jeans. It is developed for the wet season and contains a fixed Raintex ML membrane. Easy Entry Zips at the legs are extra long to simplify getting in and out. This pant is prepared for our Backconnect™ — a separately available connection zip — as well as the Belt Loop™ that's present in some of our jackets. It is finished with reflective Side Eye™ elements to make you visible where it matters most.

## ARMOUR

The Aguano is equipped with CE certified (level 1) R.I.S.C.™ FX protectors at the knees and protection for the hips is separately available. R.I.S.C.™ FX is characterised by its slim design and flexibility, aiding comfort and the discreet look of jeans and cargo pants.

***GLOVES***

////////////////////////////////////

## POWERTRACK 2.0

A full leather racing glove with a long cuff, seamless Armax™ protection all around, and a reinforced leather palm, developed in collaboration with and used by professional MotoGP athletes.

The Powertrack 2.0 consists of cow, goat and kangaroo leather. The palm is reinforced with an extra layer to increase abrasion resistance, and it features soft and impact-absorbent EVA padding.

It features a liner made of tricot and aramid, and the absence of a membrane prevents it from getting sweaty in hot conditions.

This glove is fitted with the safest possible form of protection: Armax™. This construction leaves out the need for seams in critical areas, basically eliminating the weakest link, and thus greatly increasing your safety.

In addition to seamless Armax™ at the palm, fingers, and knuckles, the cuff is now also equipped with this patented feature.

The thumb and index finger are made of one and the same panel of fabric, which prevents pressure points and gives a wrinkle free look. We call this differentiator Ergothumb™.

A Finger Bridge connects the two outermost fingers of the hand. This sturdy construction prevents the pinkie (i.e. little finger) from dislocating or worse.

The 30° Buckle™ of the wrist strap is fitted at an ergonomically optimised angle of 30 degrees, which provides the perfect fit and optimal freedom of movement.

The Powertrack 2.0 is what we call riding gear!

## THANDOR

A full leather glove with a long cuff and carbon protection at the knuckles, suited for riders in hot riding conditions.

The Thandor consists of goat and cow leather, and the palm is reinforced with an extra layer to raise abrasion resistance. The panel between the thumb and back of the hand is perforated to increase breathability.

A solid, pre-formed protector made of carbon that provides impact absorption and abrasion resistance is fitted at the knuckles. The palm features a hard, abrasion-resistant RISC™ protector. At the palm, thumb, and back of the hand, we've also fitted impact absorbent EVA padding.

This glove features our Ergothumb™ construction, meaning the thumb and index finger are made of one and the same panel of fabric. This reduces seams and pressure points whilst also giving a wrinkle-free look.

### PRODUCT CODE

Black		Black/Red		White/Red/Blue

Heat-conductive fabric is fitted at the tips of the index fingers. Thanks to the Touch Tip, you'll be able to operate touch screens without taking your gloves off.

The pinkie finger received some extra attention as it is prone to dislocating. Through our Finger Bridge, the pinkie finger is fixed to the ring finger and well protected.

To enable as much freedom of movement as possible, our 30° Buckle™ is fitted at the wrist.

The Thandor is what we call riding gear!

## OCTAVIUS **NEW**

A short-cuffed glove with seamless Armax™ protection at the knuckles and a leather palm, suited for sporty riders in hot riding conditions.

The Octavius consists of stretchy, breathable spandex and goat leather at the back of the hand. Goat leather and synthetic nubuck are used at the palm, and the cuff is made of soft, comfy neoprene. An extra layer of leather is used to reinforce the finger tips.

### KEY FEATURES

- Ergothumb™
- Armax™ knuckles
- Armax™ palm (reinforced)

3XL	148063	3XL	148075

Both the knuckles and palm are well protected by our brand new Armax™ protectors. This construction leaves out the need for seams in critical areas, basically eliminating the weakest link, and thus greatly increasing your safety.

The Armax™ palm protector is fitted onto an extra layer of synthetic nubuck that reinforces the palm. Underneath the hard abrasion-resistant cover, we've fitted soft and comfy temper foam to maintain comfort and provide additional impact absorption.

EVA padding is present at the thumb, which is rubber-like in its finish and flexibility and provides impact absorption. At the fingers you'll find TPR protection with similar characteristics.

This glove features our Ergothumb™ construction, meaning the thumb and index finger are made of one and the same panel of fabric. This reduces seams and pressure points whilst also giving a wrinkle-free look.

Heat-conductive fabric is fitted at the tips of the index fingers. Thanks to the Touch Tip, you'll be able to operate touch screens without taking your gloves off.

The Octavius is what we call riding gear!

## GLADIUS RTX DL

A long-cuffed, direct-laminate glove with rubber-like protection at the knuckles, and a reinforced leather palm, suited for riders in mild/rainy riding conditions.

The Gladius is fully made of goat leather with a double layer reinforcing the palm, and a tricot liner is fitted inside.

Its waterproof Raintex membrane is laminated directly against the outer shell. This prevents the glove from soaking up water and becoming wet, cold, and heavy. A direct laminate glove also dries much faster compared to other waterproofing methods.

This glove is equipped with knuckle protection made of thermoplastic rubber (TPR), and soft EVA protection at the palm, fingers, and cuff. Both materials provide absorption and distribution of impact forces.

Heat-conductive fabric is fitted at the tips of the index fingers. Thanks to the Touch Tip, you'll be able to operate touch screens without taking your gloves off.

To enable as much freedom of movement as possible, our 30° Buckle™ is fitted at the wrist.

We've included a flexible extension at the ridge of the index finger that works like a Screen Cleaner™, which enables quick and easy removal of water to clear up your view.

The Gladius is what we call ultimate waterproof riding gear!

## MISHUN RTX **NEW**

### DIFFERENTIATORS

The Mishun is equipped with a waterproof Raintex membrane and made of softshell fabric that provides resistance against rain and wind, breathability, and no breaking-in. Its palm is made of goat leather and reinforced with another layer to ensure a high level of abrasion resistance. This glove is lined with silky soft Bemberg for comfort and insulated to retain warmth.

It features our Ergothumb™ and Ergopink™ constructions, which reduce pressure points to raise comfort and provide a wrinkle-free look. Touchscreens can be operated thanks to the heat-conductive fabric used at the tip of the index finger. Its superb fit can be perfected by the 30° Brace™ at the wrist, which also provides improved dexterity.

### ARMOUR

Knuckles are guarded by pre-shaped R.I.S.C.™ Gemini protection, which consists of two parts, ensuring a better fit and improved overall dexterity at the handlebars. The palm is fitted with a solid, impact-absorbing, and abrasion-resistant R.I.S.C.™ protector made of TPU.

## RAPIER 2.0 RTX

A long-cuffed, waterproof, full-leather glove with rubber-like protection at the knuckles, and a reinforced leather palm, suited for riders in mild/rainy riding conditions.

The Rapier 2.0 is fully made of goat leather with a double layer reinforcing the palm. It is fitted with a waterproof Raintex membrane, making it suited for mild/rainy riding conditions.

It is equipped with knuckle protection made of thermoplastic rubber (TPR), and soft EVA protection at the palm, fingers, and cuff. Both materials provide absorption and distribution of impact forces.

Heat-conductive fabric is fitted at the tips of the index fingers. Thanks to the Touch Tip, you'll be able to operate touch screens without taking your gloves off.

We've included a flexible extension at the ridge of the index finger that works like a Screen Cleaner™, which enables quick and easy removal of water to clear up your view.

Water that accumulates between the membrane and outer shell is dispersed by the Water Exhaust™, which enables the glove to dry much faster.

The Rapier 2.0 is what we call waterproof riding gear!

## BRAWLER RTX

A long-cuffed, waterproof glove with EXO R.I.S.C. protection at the knuckles, and a reinforced palm with a double layer, suited for riders in mild/rainy riding conditions.

The Brawler consists of goat leather, cow leather and soft flex fabric. Its palm is made of leather and reinforced with an extra layer to raise abrasion resistance. We've chosen for flex fabric at the back with leather reinforcing the fingertips.

It's fitted with a waterproof Raintex membrane, making it suited for mild/rainy riding conditions.

Rubber-like, impact-absorbent protection called EXO RISC™ is fitted at the knuckles, and the middle and ring finger feature similar accents. We've opted for EVA protection at the palm and thumb, which has characteristics similar to the protection at the knuckles and fingers.

## RALSTON **NEW**

### DIFFERENTIATORS

The Ralston is based on a traditional worker glove, mixed with nearly forty years of glove knowledge to ensure a superb fit. Critical areas are reinforced with a second layer of leather, and areas without reinforcement are perforated to ensure enough ventilation.

It features our Ergothumb™ construction, which reduces pressure points to raise comfort and provides a wrinkle-free look. Touchscreens can be operated thanks to the heat-conductive fabric used at the tip of the index finger. Its superb fit can be perfected by velcro at the cuff, and the glove is finished with a retro looking MACNA graphic at the back.

### ARMOUR

Knuckles are guarded by a pre-shaped R.I.S.C.™ 3D protector, which is made of temper foam and provides impact absorption — just like the flexible EVA protection at the palm.

## HAROS 2.0 **NEW**

A short-cuffed glove with goat leather and TPR at the palm, knuckles, and fingers, meant for riders in hot conditions.

The Haros 2.0 features two layers of goat leather at the palm, and spandex fabric at the back of the hand. Spandex fabric is stretchy and breathable, making it ideal for hot riding conditions

### KEY FEATURES

- Ergothumb™
- RISC™ TPR knuckles and fingers
- RISC™ TPR palm (reinforced)

### PRODUCT CODE

Black		Black/Red		Red/Grey

Ergothumb™ is located at the thumb and index finger. This construction means the thumb and index finger are made of one and the same panel of fabric, which reduces seams and pressure points to increase comfort.

At the cuff you'll find our 30° Brace™, which is placed at an ergonomically optimised angle and provides a secure fit at the wrist.

Heat-conductive fabric is fitted at the tips of the index fingers. Thanks to the Touch Tip, you'll be able to operate touch screens without taking your gloves off.

The Haros 2.0 is what we call riding gear!

## TANAMI

A short-cuffed leather glove with EXO RISC™ protection at the knuckles, suited for riders in hot riding conditions.

The Tanami consists of breathable spandex at the back of the hand and goat leather at the palm, with an extra layer reinforcing the most critical areas, such as the palm and fingers.

A rubber-like TPR protector is fitted at the palm, and the knuckles are protected by a combination of EXO RISC™ and impact-absorbent temper foam.

EXO RISC™ is developed from our interior RISC™ impact protectors and provides flexibility, breathability and comfort.

This glove features our Ergothumb™ construction, meaning the thumb and index finger are made of one and the same panel of fabric. This reduces seams and pressure points whilst also giving a wrinkle-free look.

Heat-conductive fabric is fitted at the tips of the index fingers. Thanks to the Touch Tip, you'll be able to operate touch screens without taking your gloves off.

The Tanami is what we call riding gear!

## BOLD

A short-cuffed, leather glove with soft protections at palm and cuff, and a solid knuckle protector, developed for riders in hot riding conditions.

The Bold consists fully of goat leather with perforations at the back of the hand to ensure ventilation.

Protection of the palm is present in the form of EVA, which is rubber-like in its finish and flexibility and provides impact absorption. This material is also used in the padding of the cuff.

The knuckles are fitted with a solid, preformed 3D protector that absorbs and distributes impact forces.

This glove features our Ergothumb™ construction, meaning the thumb and index finger are made of one and the same panel of fabric. This reduces seams and pressure points whilst also giving a wrinkle-free look.

The Bold is what we call riding gear!

## ZAIRON

A short-cuffed glove with EXO RISC™ protection at the knuckles, suited for riders in hot riding conditions.

The Zairon consists of spandex at the back of the hand and synthetic nubuck at the palm, with an extra layer reinforcing the most critical areas, including fingertips.

It is fitted with a tricot liner and the absence of a membrane makes it suited for hot riding conditions.

Areas of the palm and thumb are reinforced with ethylene vinyl acetate (EVA) which is rubber-like in its finish and flexibility and provides impact absorption.

EXO RISC™ protection can be found at the fingers and the knuckles are protected by a combination of EXO RISC™ and impact-absorbent temper foam.

This glove features our Ergothumb™ construction, meaning the thumb and index finger are made of one and the same panel of fabric. This reduces seams and pressure points whilst also giving a wrinkle-free look.

Heat-conductive fabric is fitted at the tips of the index fingers. Thanks to the Touch Tip, you'll be able to operate touch screens without taking your gloves off.

The Zairon is what we call the essence of riding gear!

## DARKO

A comfy glove with a short cuff, EVA padding at the knuckles, and a rubber-like TPR protector at the palm, suited for riders in hot riding conditions.

The Darko is made of synthetic nubuck (leather) and spandex, a combination that provides an incredible level of comfort when temperatures start to soar.

Soft EVA padding is located at the knuckles to raise your comfort some more. At the palm, we've opted for a protector made of TPR for additional impact absorption.

The inside of the fingers are fitted with a Grip Print, and the thumb and index finger are made of one and the same panel of fabric. This feature is called Ergothumb™ and raises your comfort by reducing seams and pressure points.

The Darko is what we call the essence of riding gear!

## PELGRAM COOLING **NEW**

### ONE OF A KIND

The Pelgram's most unique feature is its cooling liner, which is made of a newly developed material called Evercool™ that provides a cooling effect when it comes into contact with your skin. Mesh is used at the back and perforated nubuck throughout for optimal ventilation. The palm is made of synthetic nubuck and reinforced with an extra layer to ensure a high level of abrasion resistance.

It features our Ergothumb™ construction, which reduces pressure points to raise comfort and provides a wrinkle-free look. Touchscreens can be operated thanks to the heat-conductive fabric used at the tip of the index finger. Its superb fit can be perfected by velcro at the cuff.

### ARMOUR

Knuckles are guarded by a pre-shaped R.I.S.C.™ 3D protector, which is made of temper foam and provides impact absorption — just like the flexible EVA accents at the thumb and fingers. The palm is fitted with a solid, impact-absorbing, and abrasion-resistant R.I.S.C.™ protector made of TPU.

## CREWSER RTX **NEW**

### ALL SEASONS

The Crewser is equipped with a waterproof Raintex membrane and made of cow leather, synthetic nubuck, and dynamic stretch fabric. It has a dual-compound rubber sole and an Ortholite inner sole. It is 33 centimetres high and closed by velcro at the top. A zip is located on each side for easy entry and reflection is present in the form of Side Eye™. The complete package offers high levels of protection, durability, and comfort all year round. A little extra is included in the form of a quick shift-cover that's super easy to fit on the shift pedal of your motorcycle.

### ARMOUR

This boot is equipped with R.I.S.C.™ protection at the ankle and shin. Additionally, it is reinforced in vulnerable areas such as the heel, toes, and sides. A shift pad is present on top to prevent rapid deterioration due to changing gears.

## BACKPACK MUBP RIDEFORD **NEW**

A waterproof backpack with a utility-style look, Night Eye™ fabric, and P.A.L.S. to expand luggage capacity.

The main compartment of the Rideford features a two-way zip, a waterproof pocket with a waterproof zip, and a hydration port. Its secondary compartment is also fitted with a two-way zip. Mesh pockets are present at the sides to store things like bottles and such.

This backpack provides a total of 18 litres of additional luggage capacity.

The front consists largely of Night Eye™ fabric: grey fabric covered with microscopic dishes that reflect light back to its source. It increases visibility when it really matters, without making you look like a traffic sign all the time.

A modern variant of P.A.L.S. is also present at the front of the backpack.

Its back and straps are fitted with foam and mesh to create a little distance between the bag and the body, which provides the needed ventilation. The back is also equipped with a Hydration Port so you can hydrate whilst riding.

The shoulder straps are ergonomically designed and can be secured at the chest. This prevents the weight from resting on the shoulders and provides increased freedom of movement and comfort.

Its shoulder straps are also fitted with openings that enable you to attach our MUCB Chestor bag to the Rideford backpack. When taking off your backpack, the chest bag stays attached on one side (left or right) after detaching it on the other side.

These openings can also be used to guide the nozzle of your hydration bladder that's coming out of the Hydration Port.

The MUBP Rideford is what we call practical riding gear!

### KEY FEATURES

- P.A.L.S.
- Night Eye™
- 18 litre capacity

## CHEST BAG MUCB CHESTOR NEW

A waterproof chest bag with a utility-style look, Night Eye™ fabric, and P.A.L.S. to expand luggage capacity.

The main compartment is closed by a two-way zip and provides 4 litres of storage capacity. Inside the main compartment there is a 100% waterproof pocket with a rolltop closure, closed by a waterproof zip.

It can be worn on the body by using the back piece, which is secured by buckle closures.

Alternatively, this bag can be attached directly to a load-bearing platform with P.A.L.S. thanks to the two straps at the back. A modern variant of P.A.L.S. is also present at the front of the chest bag.

It is also possible to attach the Chestor directly to our Rideford backpack. When taking off your backpack, the chest bag stays attached on one side (left or right) after detaching it on the other side.

Its front side consists mainly of Night Eye™ fabric: grey fabric covered with microscopic dishes that reflect light back to its source. This increases visibility when it really matters, without making you look like a traffic sign all the time.

The MUCB Chestor is what we call practical riding gear!

## MUBP TRAVELHAM NEW

### DIFFERENTIATORS

The Travelham backpack is developed for adventure & touring riders and designed in our utility style, with practical fabrics and multiple storage compartments. This makes the backpack lightweight, durable, and practical with a total of 4 pockets — 2 at the sides with a waterproof zip, and a large waterproof compartment with a rolltop closure and a secondary compartment inside.

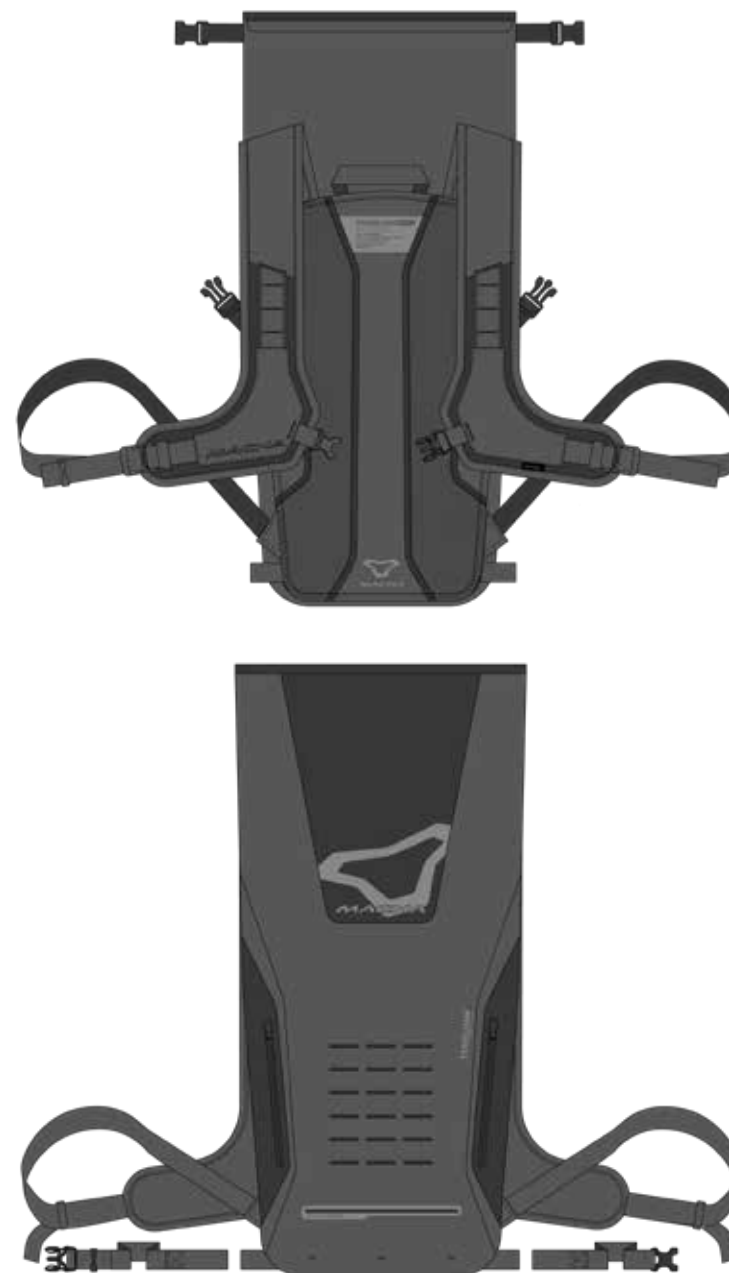

Its rolltop is closed by buckles, and the shoulders straps are secured at the front by a magnetic closure. The backpack is equipped with a Water Exhaust™ that disperses any vapour that might accumulate behind the outer shell. Its straps are 3-dimensional to create space between your back and backpack, preventing sticky situations in sweaty conditions.

The Travelham's dimensions are 50 x 30 x 17 centimetres and if that's not enough, storage capacity can be expanded by attaching our Rocktopus base plate to the back, which enables you to attach another MACNA utility bag to the base plate. Its Night Eye™ fabric makes you better visible when it matters without compromising your look by day, similar to Side Eye™ reflection at the sides.

## SPRAY RAIN JACKET

A waterproof jacket that can be worn over a motorcycle jacket, developed for riders in rainy conditions.

The Spray rain jacket is made of waterproof polyester and equipped with an air outlet at the back to prevent the jacket from blowing up like a parachute. Its fit can be adjusted at the cuffs.

This jacket is fitted with laminated reflective elements on all sides and our in-house developed Coat Hanger Lite™ at the back so you can easily hang your jacket to dry.

Its Storage Bag is equipped with a Water Exhaust™ to enable any remaining waterdrops to evaporate.

The Spray is what we call rainwear!

## SPRAY RAIN PANTS

A waterproof pants that can be worn over a pair of motorcycle pants, developed for riders in rainy conditions.

The Spray rain pants is made of waterproof polyester and designed to be easy to put on. Both at the waist and ankles, this pants is very wide to ensure easy entry.

Its fit can be adjusted by velcro at the cuffs and by snap at the waist.

At the cuffs you'll also find laminated reflective elements, whereas the waist is fitted with stretch fabric to ensure the pants stays in place.

Its Storage Bag is equipped with a Water Exhaust™ to enable any remaining waterdrops to evaporate.

## BACK PROTECTOR RISC

The safest choice. An ergonomically designed and breathable back protector that is worn inside the jacket, providing CE level 2 protection for your entire back. This full back (FB) protector provides the highest level of protection and covers the largest possible area.

### RIDERS IMPACT SAFETY CONCEPT

The R.I.S.C.™ full back protector is made of polyurethane (PU), which provides high tear resistance, flexibility, and toughness — even in extremely hot and cold conditions.

Like all our protectors, it follows the contours of the body to provide an ergonomic fit. This provides much better impact absorption compared to a protector that leaves a little space between itself and your back.

Thanks to its unique structure, the protector is capable of absorbing and distributing impact forces to keep you safe. The hexagonal structure is hollow in the centre to raise both flexibility and ventilating capabilities.

The R.I.S.C.™ full back protector is tested, approved, and fully complies with European law. It provides CE level 2 safety and is available in two sizes. Make sure to check out the size table before you purchase a back protector.

That's what we call riding gear!

# E-HEATED ECOSYSTEM

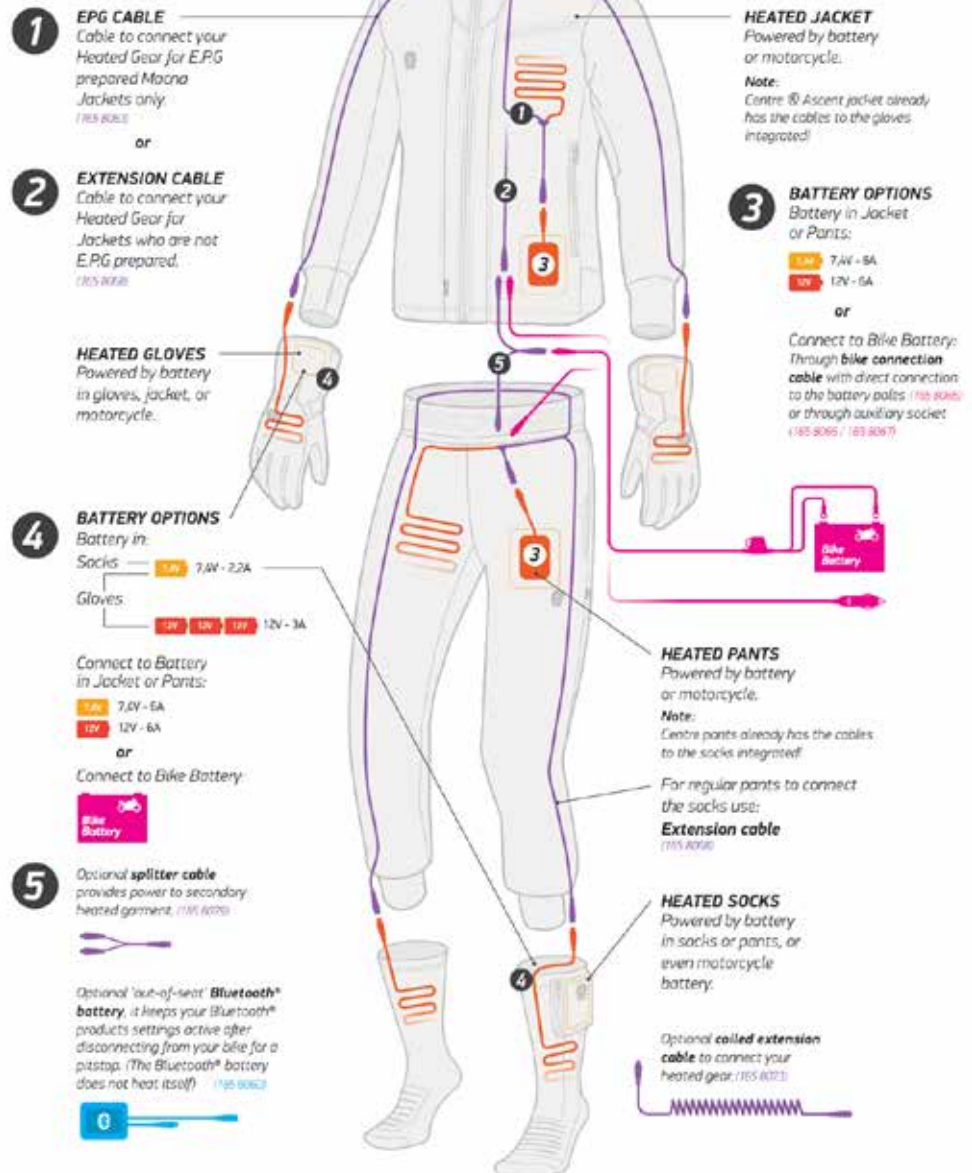

With 20 years of experience and numerous in-house developed technologies, we are your wingman in the cold. Our e-heated ecosystem includes several garments that enable you to heat any and every body part you want.

The unique Dual Power technology lets you switch between a 7,4V and 12V power supply whenever you like. There are three ways to power your garments; a battery in the glove or jacket, or a direct connection to your motorcycle.

Batteries feature our Power Expansion System, which divides the cells of a battery in an ergonomic way to prevent bulk at the wrists. Bluetooth® technology is present in our ecosystem, enabling you to connect all garments to the MACNA Heated app and control them with one hand.

Our e-heated ecosystem provides full freedom when it comes to combining different garments and a suitable power supply to brave the cold.

THAT'S  
WHAT WE CALL  
WARMTH AND  
COMFORT!

# 5 STEPS TO WARMTH AND COMFORT

## STEP 1

### CHOOSE YOUR HEATED COMBINATION

#### JACKETS

BIKE OR  
BATTERY  
POWERED

#### GLOVES

BIKE OR  
BATTERY  
POWERED

#### PANTS & SOCKS

BIKE OR  
BATTERY  
POWERED

## STEP 2

### CHOOSE YOUR GARMENTS

JACKETS / PANTS / GLOVES / SOCKS

## STEP 3

### CHOOSE YOUR POWER SUPPLY

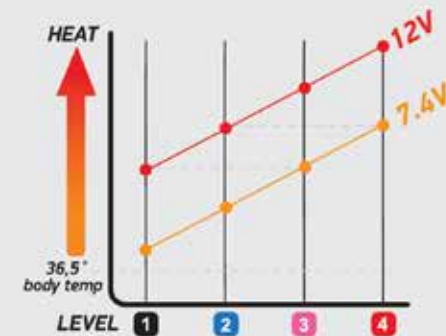

7,4V

or

12V

12V batteries heat faster and reach higher temperatures compared to 7.4V. The higher the amperage of the battery, the longer it'll last before it needs a recharge.

## STEP 4

### ACCESSORIES

#### CABLES

#### BLUETOOTH BATTERY

#### HEATED (BLUETOOTH) GRIPS

## STEP 5

### INSTALLATION

#### HEATED APP

The MACNA Heated App lets you take full control over your e-heated gear. Connect your gear to your phone via Bluetooth® and you'll never have to search for tucked away power buttons every again.

## Material

- Shell: 97% polyamide (e.g., GORE-TEX ARMACOR™), 2% aramid, 1% elastane;
- Mesh lining: 100% polyester (recycled);
- Thermal lining: 100% polyester (PrimaLoft®);
- Membrane: 100% ePE (GORE-TEX Pro)

# BORNHOLM PRO

The Dane Bornholm Pro Motorcycle Jacket is designed for adventure riders who need superior protection and comfort in all weather conditions. Featuring a GORE-TEX® Pro 3-layer laminate, this jacket is both waterproof and highly breathable, ensuring you stay dry without overheating during long rides. Its outer shell is constructed from durable CORDURA® fabric, offering excellent abrasion resistance and durability.

For impact protection, the Bornholm Pro comes equipped with RISC shoulder and elbow armour, providing top-tier shock absorption in the event of a fall. The jacket also has a thermal lining that is removable, making it versatile enough for use in both cold and warm weather. Ventilation zippers strategically placed on the chest and back allow for optimal airflow, keeping you cool on hot days.

The jacket is designed with a comfortable fit and features multiple adjustment points for a tailored feel. It also includes reflective detailing for enhanced visibility in low-light conditions, ensuring safety during night rides. With its rugged construction and practical features, the Dane Bornholm Pro is perfect for motorcyclists looking for dependable gear that performs in all seasons.

- Adjustable cuff
- Adjustable waist strap
- Connects with pants

# NIMBUS 2 PRO

## DANE NIMBUS 2 GTX – Ultimate Protection for Extreme Adventure Riding

For adventure and touring riders who demand the best, the **DANE Nimbus 2 Jacket** is built to conquer the most extreme riding conditions. Designed with premium materials and cutting-edge technology, this jacket ensures **waterproofness, breathability, and top-tier safety** for every journey—no matter how challenging the terrain or unpredictable the weather.

- Gore-Tex Pro membrane
- 3-layer construction
- STORMCUFF

### Uncompromising Weather Protection

Crafted with GORE-TEX® MISANO, the Nimbus 2 features a 3-layer construction of CORDURA® with a GORE-TEX® PRO membrane laminated on both sides. This ensures complete waterproofing while maintaining exceptional abrasion resistance.

Additionally, ARMACOR™ reinforcement at the shoulders, elbows, and back—a blend of CORDURA® fiber and KEVLAR®—delivers leather-like strength, offering maximum impact and abrasion protection without compromising flexibility.

Additionally, ARMACOR™ reinforcement at the shoulders, elbows, and back—a blend of CORDURA® fiber and KEVLAR®—delivers leather-like strength, offering maximum impact and abrasion protection without compromising flexibility.

### Advanced Ventilation System

Stay cool when the ride heats up. The Nimbus 2 features four YKK AQUASEAL® zippers for optimal airflow at the chest and upper arms. These innovative zippers are 100% waterproof when closed, and when opened, they provide direct airflow through the membrane, ensuring superior cooling during intense rides.

### Lightweight Yet Tough

Despite its heavy-duty construction, the Nimbus 2 weighs approximately 2.5 kg (depending on size). It includes CE-certified Level 2 protectors at the back, shoulders, and elbows, with adjustable positioning for a customized fit.

### Total Comfort in Every Season

STORMCUFF® sleeve ends create a seamless, waterproof connection with DANE gloves for all-weather protection.

A detachable winter/rain collar prevents water intrusion and enhances insulation in colder temperatures.

The thermal liner features a double chest flap to block wind and cold air, ensuring consistent warmth in extreme conditions.

Stretch panels at the waist and inner arms provide exceptional flexibility and comfort for long rides.

### Innovative Waterproofing Features

Double rain tunnel front zip prevents water ingress—even after six hours of heavy rain.

Two large, 100% waterproof front pockets with GORE-TEX® lining and secure closures to keep valuables dry.

The 3-layer PRO laminate prevents water absorption, ensuring the jacket remains lightweight and quick-drying, even after long rides in the rain.

### Secure Fit & Enhanced Safety

For complete riding security, the Nimbus 2 seamlessly connects to the matching Lyngby Air 2 trousers using a short or long connection zipper. This prevents the jacket from shifting while riding and ensures it stays firmly in place during a slide, providing continuous protection.

### The Ultimate Choice for Serious Riders

Whether you're commuting through unpredictable weather or embarking on a cross-continent adventure, the DANE Nimbus 2 Jacket is your ultimate riding companion. Engineered for riders who refuse to compromise on performance, protection, and comfort, this jacket ensures an unparalleled experience on the road and beyond.

# SVENDBORG GORE-TEX

The Dane Svendborg Motorcycle Jacket offers a perfect balance of protection, comfort, and versatility for touring and everyday riders. Built with a 2 Gore-Tex layer-laminate, it ensures waterproof and windproof protection while remaining breathable, making it suitable for all weather conditions. The jacket's durable polyamide fabric construction delivers high resistance to abrasion, keeping you safe during long rides.

For added protection, the Svendborg comes equipped with SAS-TEC armor at the shoulders and elbows, offering exceptional impact absorption. The jacket also features a removable thermal lining, allowing you to adapt to changing temperatures, making it ideal for both colder climates and warmer weather.

Ventilation zippers are strategically placed to improve airflow, keeping you cool on hotter rides. Adjustable waist and cuff closures ensure a customized fit, while reflective details enhance visibility in low-light conditions, promoting safety during night rides.

With its combination of practical features and premium materials, the Dane Svendborg is designed for riders who demand reliable performance and comfort in all conditions, whether you're commuting or embarking on long-distance tours.

## LYNGBY AIR 2 PRO GORE-TEX

The Dane Lyngby Air 2 GORE-TEX Pro Motorcycle Trousers are engineered for riders who seek ultimate comfort and protection in any weather. Featuring a durable GORE-TEX Pro membrane, these trousers are fully waterproof, windproof, and highly breathable, ensuring optimal performance in both wet and dry conditions.

Constructed with robust CORDURA® fabric, the Lyngby Air 2 trousers offer excellent abrasion resistance, while SuperFabric® reinforcement in key impact areas enhances durability and protection. For added safety, SAS-TEC armour is included at the knees and hips, providing superior impact absorption.

The trousers are designed with large ventilation panels, offering enhanced airflow for comfort during warm-weather rides. Adjustable waist straps and leg cuffs allow for a personalized fit, while reflective detailing increases visibility in low-light conditions.

Ideal for touring and adventure riders, the Dane Lyngby Air 2 GORE-TEX Pro trousers are built for those who demand versatility, protection, and comfort on every journey.

## NYBORG AIR 2 GORE-TEX

The Dane Ladies Nyborg Air 2 Gore-Tex Trousers are built for female motorcyclists seeking maximum comfort and performance. Featuring a durable, breathable Gore-Tex membrane, these trousers are waterproof while offering excellent airflow through strategically placed ventilation panels. Reinforced with abrasion-resistant materials at critical points, they provide superior protection. The Nyborg Air 2 includes adjustable waist and leg features for a customizable fit, and removable thermal and waterproof liners for versatile use across different weather conditions. Ideal for summer touring, these trousers blend protection, breathability, and comfort, keeping you ready for any adventure.

## ELLING GORE-TEX

The Dane Elling GORE-TEX Motorcycle Trousers are designed for riders who demand top-level protection and comfort in all weather conditions. Made with a GORE-TEX 2-layer laminate, these trousers are completely waterproof, windproof, and highly breathable, ensuring you stay dry and comfortable in any riding environment.

Constructed with durable polyamide fabric, the Elling trousers offer exceptional abrasion resistance, while SuperFabric® reinforcement in high-impact areas provides added durability and safety. SAS-TEC armour at the knees and hips ensures superior impact protection in case of a fall.

The trousers are equipped with adjustable waist and leg closures for a secure, custom fit. Ventilation zippers enhance airflow for added comfort in warm weather, and reflective detailing ensures better visibility in low-light conditions. Whether touring or commuting, the Dane Elling GORE-TEX trousers provide premium weatherproofing, safety, and comfort for long-lasting riding performance.

- GORE-TEX®

### Uncompromising Weather Protection

Constructed with a GORE-TEX Z-liner, the Århus GTX gloves are 100% waterproof, ensuring your hands stay dry even in the most relentless downpours. The breathable membrane also wicks away moisture, keeping your hands comfortable and fresh during long rides.

### Superior Comfort & Flexibility

Made from premium full-grain leather, these gloves provide an exceptional balance of durability and suppleness. Strategically placed stretch fabric between the fingers enhances mobility and ensures a snug, fatigue-free fit, even on extended journeys.

### Advanced Safety Features

Your safety is our priority. The integrated 3D knuckle protector offers outstanding impact protection, while reinforced, covered seams enhance durability and resistance to abrasion. The securely stitched liner prevents discomfort and ensures a perfect fit every time you put them on.

### Enhanced Riding Experience

- Touchscreen-compatible fingertips let you operate your GPS or smartphone without removing your gloves.
- A built-in visor wiper on the index finger ensures clear vision in rainy conditions.
- The ergonomic pre-curved design reduces hand fatigue, making long rides more enjoyable.

### Designed for Every Adventure

Whether you're exploring mountain passes, cruising through city streets, or embarking on an all-season touring expedition, the Århus GTX gloves deliver unbeatable protection, comfort, and performance. Ready to tackle any challenge, these gloves are an essential part of your gear.

Gear up with **DANE Århus GTX** and experience the perfect fusion of safety, style, and adventure!

## NUUK LADY GORE-TEX

The Dane Nuuk Ladies Gore-Tex Motorcycle Gloves are designed specifically for women riders who demand top-tier protection and comfort. Featuring a Gore-Tex® membrane, these gloves provide excellent waterproofing and breathability, keeping hands dry and comfortable in all weather conditions. CE-approved protection on the knuckles and reinforced palms ensure robust safety, while the soft lining and tailored fit offer maximum comfort for long rides. The gloves also feature an adjustable Velcro strap for a snug fit, touchscreen compatibility for device use, and reflective detailing for enhanced visibility. Ideal for touring, the Nuuk gloves combine functionality, safety, and style seamlessly.

# PRODUCT STANDS

Offered in two practical configurations—a wall unit with shelves for compact and organized displays and a centre unit ideal for high-traffic showroom areas—these stands enhance product visibility and accessibility. Built for durability and ease of use, they create an appealing, efficient setup to showcase apparel and maximize sales potential in dealer locations.

The wall unit with shelves are for presenting apparel all at once, making them ideal for showcasing the range and the brand cohesively together.

For more product information and procurement, contact our sales team.

# MOTO 4T

# SHOGUN

OUR MOST ADVANCED 4-STROKE ENGINE OIL EVER

## DARE TO TAKE THE LEAD WITH SHOGUN

IPONE proudly unveils SHOGUN – its most premium engine oil ever, born from competition and crafted for the most demanding riders. Whether you're a track racer or a road performance enthusiast, SHOGUN delivers the best of engine technology – with zero compromise.

Its bold design is rooted in its Japanese DNA. SHOGUN is an iconic, ultra-high-performance oil – and its name, meaning “supreme commander,” is well earned.

### KEY FEATURES

- Outstanding performance
- Used in the Red Bull MotoGP Rookies Cup and the FIM Endurance World Championship (EWC)
- Maximum engine protection

### SHOGUN

# CLUTCH ONE

**MINERAL TRANSMISSION OIL FOR HYDRAULIC CLUTCH CONTROLS**

## THE MINERAL CLUTCH FLUID

CLUTCH ONE and its additives guarantee a quick and effective reaction of the clutch both hot and cold.

It is NOT suitable for Dot 4 hydraulic systems that require 100% synthetic Brake Dot 4 clutch fluid.

Its red color is clearly visible during purging, its tube format with pour spout is convenient to perform a precise dosage, without putting any aside!

### KEY FEATURES

- For hydraulic clutch controls
- Compatible with sealing joints
- For road and off-road motorcycles
- Tube with pour spout

### PRODUCT CODE

125ml 800545

# RADIATOR LIQUID

**READY TO USE COOLANT**

## SAVE UP TO 5 DEGREES ON YOUR ENGINE TEMPERATURE

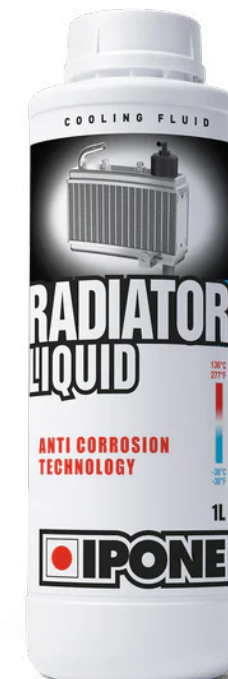

RADIATOR LIQUID guarantees optimal cooling of your engine and protection of the entire cooling circuit (hoses, water pump, aluminium and magnesium housing, radiator) by eliminating deposits, thanks to its anti-corrosion and anti-oxidation action.

### KEY FEATURES

- Allows you to save up to 5° C on your engine temperature
- Anti-freeze protection
- Removes deposits
- Blue colour

# CHAIN CLEANER

POWERFUL CHAIN DEGREASER

## KEY FEATURES

- Powerful and precise spray
- Effective against the most stubborn greases
- Multi-position diffuser with retractable rod
- Compatible with O-rings

## PRODUCT CODE

750ml 800649

# FULL PROTECT

6 IN 1 MULTI-PURPOSE PENETRATING OIL AND  
DEGREASER

## KEY FEATURES

- Moisture repellent
- Lubricates mechanical parts
- Releases jammed mechanisms
- Leaves a protective layer to prevent rust

## PRODUCT CODE

250ml	800663
750ml	800664

# PLASTIC SHINE

SILICONE BASED PLASTIC RENOVATOR

## KEY FEATURES

- Renovates dull plastics
- Effortlessly
- Without damaging plastics
- Without traces or greasy layer

## PRODUCT CODE

250ml	800665
750ml	800666

# CLEANER POLISH

MULTI-SURFACE CLEANING WAX

## KEY FEATURES

- Effortlessly cleans and polishes
- Leaves no traces or greasy finish
- To be used without water with a microfibre wipe
- Removes micro-scratches

## PRODUCT CODE

250ml 800668

750ml 800669

# WATERPROOF GREASE

WATER RESISTANT (EVEN SALTED!) MECHANICAL GREASE

## KEY FEATURES

- Prevents breakage and oxidation of parts
- Perfect for bearings, joints, axes and other pivots
- Good adhesion to moving parts
- Durability and efficiency over time

## PRODUCT CODE

200g 800673

# CHROM'ALU

RENOVATING CREAM FOR CHROME AND ALUMINUM WITH ACTIVE MICROBEADS

## KEY FEATURES

- Removes rust marks and pitting
- Removes light scratches
- Leaves a protective layer that allows to durably preserve their shine
- Cap that opens with a simple gesture of the thumb

## PRODUCT CODE

200ml 800675

# WHEEL CLEANER

POWERFUL RIM DEGREASER

## KEY FEATURES

- Leaves protective layer that delays the appearance of new dirt
- Comfortable trigger & wide and homogeneous diffusion
- Does not damage paints and varnishes
- Compatible with all types of rims

## PRODUCT CODE

1litre 800656

# S.O.S TYRE

PUNCTURE-PROOF SPRAY

## KEY FEATURES

- Compatible with all types of tyres
- Convenient portable format

## PRODUCT CODE

200ml 800657

# BRAKE CLEANER

POWERFUL DEGREASER

## KEY FEATURES

- Removes dust from the brake and clutch system
- Prevents brake squeal
- Extends the service life of brake discs and pads
- Dries quickly without leaving any residue

## PRODUCT CODE

750ml 800658

# AIR FILTER OIL LIQUID

FOR FOAM AIR FILTERS

## KEY FEATURES

- Boost your engine power
- For off-road motorcycles and quads
- Fast drying
- Blue colour

## PRODUCT CODE

500ml 800651

# AIR FILTER OIL SPRAY

FOR FOAM AIR FILTERS

## KEY FEATURES

- Holds water, mud, dust and sand
- Boost your engine power
- Wide and homogeneous spraying
- Blue colour

## PRODUCT CODE

750ml 800652

# HELMET'OUT

CLEANING SPRAY FOR THE EXTERIOR OF THE HELMET

## KEY FEATURES

- Efficient on glossy and matt paints
- Does not leave traces
- Does not drip
- Practical transportable format

## PRODUCT CODE

100ml 800677

# HELMET'IN

CLEANING SPRAY FOR THE INTERIOR OF THE HELMET

## KEY FEATURES

- Feeling of freshness
- Evaporates in minutes without leaving traces
- No need to disassemble the helmet
- Convenient transportable format

## PRODUCT CODE

150ml 800678

# HELMET KIT

1 HELMET EXTERIOR CLEANER + 1 HELMET INTERIOR CLEANER + 1 RAIN REPELLENT + 1 MICROFIBRE WIPE

## KEY FEATURES

- Allows you to completely clean your helmet
- Easy to use and highly effective products
- Practical transportable format, can be put under the saddle
- Re-usable Microfibre Wipe

## PRODUCT CODE

800735

# ROAD CHAIN CARE

1 ROAD CHAIN GREASE 750ML + 1 CHAIN CLEANER 750ML + 1 CHAIN BRUSH

## KEY FEATURES

- Degreaser with powerful spray
- Long-lasting grease - 800 km
- Efficient brush
- Retractable rod attached to the sprays

## PRODUCT CODE

800736

# OFF ROAD CHAIN PACK

1 OFF ROAD CHAIN GREASE 750ML + 1 CHAIN  
CLEANER 750ML + 1 CHAIN BRUSH

## KEY FEATURES

- Degreaser with powerful spray
- A water-resistant off-road chain grease
- Retractable rod attached to the sprays
- Efficient brush

## PRODUCT CODE

800737

# CLEANING KIT

1L MULTI-SURFACE CLEANER + 1L WHEEL CLEANER  
+ 1 WASH MITT + 1 WHEEL BRUSH

## KEY FEATURES

- Degreaser with powerful spray
